NATIONAL  
**RYAN WHITE**  
CONFERENCE  
ON HIV CARE & TREATMENT

# LDH SHHP: Baseline Data System Landscape

# LDH SHHP Systems Modernization Plan

# End-User Involvement in System Development

- Transfer from Florida
- Transformation from Florida Linkage Module to Louisiana Linkage Module
  - Successes
    - Prioritization of changes
    - Document exchange and signatures
    - Weekly open meeting
  - Challenges
    - Role of the system

LDH modified FL's system with aim to support case management across three disease areas

### ***Louisiana Application Development Team Resources***

- 2 Application Developers at ½ time
- 1 Database Developer at ½ time

### ***Technical Changes***

- Addition of client intake form
- Modification of client contact attempt to support multiple contact methods and outcomes
- Configuration application to work with active directory authentication
- Completely rebuild ETL process to pull from Louisiana's surveillance systems
- Migration from LA LINKS Access database

# Next Step - Full Implementation of Case Management Systems

- Targeting end of July 2022 for Hepatitis Case Management features to go live
- End Users will test the system
- Once Hepatitis linkage system is complete, will begin the process for HIV
