

Comparison Snapshot

Ryan White HIV/AIDS Program Compass Dashboard and the HIV Quality Measures Module

The Health Resources and Services Administration’s (HRSA) HIV/AIDS Bureau (HAB) has two tools to assist in the review of Ryan White HIV/AIDS Program (RWHAP) data. The first tool is the RWHAP Compass Dashboard, a user-friendly, interactive data tool to visualize the reach, impact, and outcomes of the RWHAP. The second tool is the HIV Quality Measures (HIVQM) Module, which allows RWHAP recipients to voluntarily enter aggregate HAB performance measures data and make comparisons. This comparison snapshot is intended to help RWHAP recipients and subrecipients better understand the features of the RWHAP Compass Dashboard and the HIVQM Module.

Platform	RWHAP Compass Dashboard	HIVQM Module
Purpose and Use	Visualize the reach, impact, and outcomes of the RWHAP	Aid RWHAP recipients in developing and implementing clinical quality management programs: <ul style="list-style-type: none"> ➤ Monitor their performance in serving clients, particularly in providing access to care and quality HIV services ➤ Set goals for performance measures and quality improvement projects ➤ Obtain reports that compare providers within their state, regionally, nationally, and RWHAP Part
Available Performance Measures	Two HAB Performance Measures: <ol style="list-style-type: none"> (1) Viral suppression (2) Retention in care 	All HAB Performance Measures Users choose which measures to include
Data Source	Ryan White HIV/AIDS Program Services Report (RSR) and AIDS Drug Assistance Program Data Report (ADR) data	<ul style="list-style-type: none"> ➤ RWHAP recipients’ HAB Performance Measure results (numerator, denominator, and percentage) from their clinical quality management program ➤ Includes only data entered into the HIVQM Module

Data Displayed	Aggregate: <ul style="list-style-type: none"> ➤ Outcomes, demographics, and performance for years 2010-2019 ➤ Priority populations for years 2010-2019 ➤ RWHAP services received for years 2010-2019 ➤ RWHAP ADR for years 2014-2018 ➤ National, State, and EMA/TGA levels 	Aggregate: <ul style="list-style-type: none"> ➤ Most recent five years of data entered into HIVQM ➤ Provider-level performance measure data ➤ State, Regional, and National performance measure data ➤ Performance measure data by RWHAP Part ➤ Performance measures, including demographics, for four different 12-month time periods (collected four times a year)
Interactive Data Displays?	Yes – Full Interaction	Yes – Partial Interaction Users can choose performance measures to create state, regional, national, and RWHAP Part reports
RWHAP Parts	Parts A, B, C, and D	Parts A, B, C, and D
Comparisons/Benchmarking	Users can make comparisons across all RWHAP recipients and subrecipients. Benchmarking on HIV outcomes (performance measures) for states and EMA/TGAs is available on the impact dashboard	Users can compare data with other RWHAP recipients and subrecipients who enter data into HIVQM
Frequency of Data Updates	Annually, in alignment with available RSR and ADR data	Quarterly Exception: In March of each year, users can input data for past reporting periods if a month is missing or if data updates are needed
Data Update Responsibility	HRSA HAB	RWHAP Parts A-D recipients using the HIVQM
Access Location	HRSA Data Warehouse – RWHAP Compass Dashboard	HRSA Electronic Handbook – RSR Report

As of April 2022
