Conduct Your Needs Assessment

Identify key target populations, issue areas, and capacity building needs for your organization.

Identify Applicable Evidence-Informed Interventions

You don't have to reinvent the wheel. Proven interventions exist.

Select the Evidence-Informed Intervention

You don't have to conduct a deep analysis. IHIP has done that for you.

Implement the Intervention

Using IHIP resources to leverage proven interventions, lessons learned, and best practices can help:

- Advance the HIV care continuum
- Improve health outcomes among target populations
- Move towards HIV elimination in the U.S.

Let us help you build a better program for a brighter future.
