CAREWare 6 User Input and Future Directions
2020 National Ryan White Conference on HIV Care and Treatment
August 12-14, 2020

John Milberg
Health Scientist, Division of Policy & Data
HIV/AIDS Bureau (HAB)
Jeff Murray and Bill Devlin, jProg, Inc., New Orleans, LA

Vision: Healthy Communities, Healthy People

HRSA's HIV/AIDS Bureau (HAB) Vision and Mission

Vision

Optimal HIV/AIDS care and treatment for all.

Mission

Provide leadership and resources to assure access to and retention in high quality, integrated care, and treatment services for vulnerable people with HIV/AIDS and their families.

Goals of this session on CAREWare 6

- Review some of the latest features and future directions
  - Provider and Client Summaries
  - Data import/interoperability project with HRSA's Bureau of Primary Health Care

- Provide a forum to obtain user input and better understand your experience with the new version

- Discuss future directions
  - User interface and design aspects that you do and do not like
  - Functionality that could be improved or updated?
 - New Features?

Provider Summaries

- Upon login, shows important provider rates for any performance measures

- Shows how rates change over time

- Provides hyperlinks to clients who do and don't meet the measure

- Design flexibility allows users to select colors, fonts, etc.

Client Summaries

- Upon login, shows important changes over time for labs/vital signs of interest

- Design flexibility allows users to
  - change date range,
  - add demographic info;
  - select colors, fonts, etc.
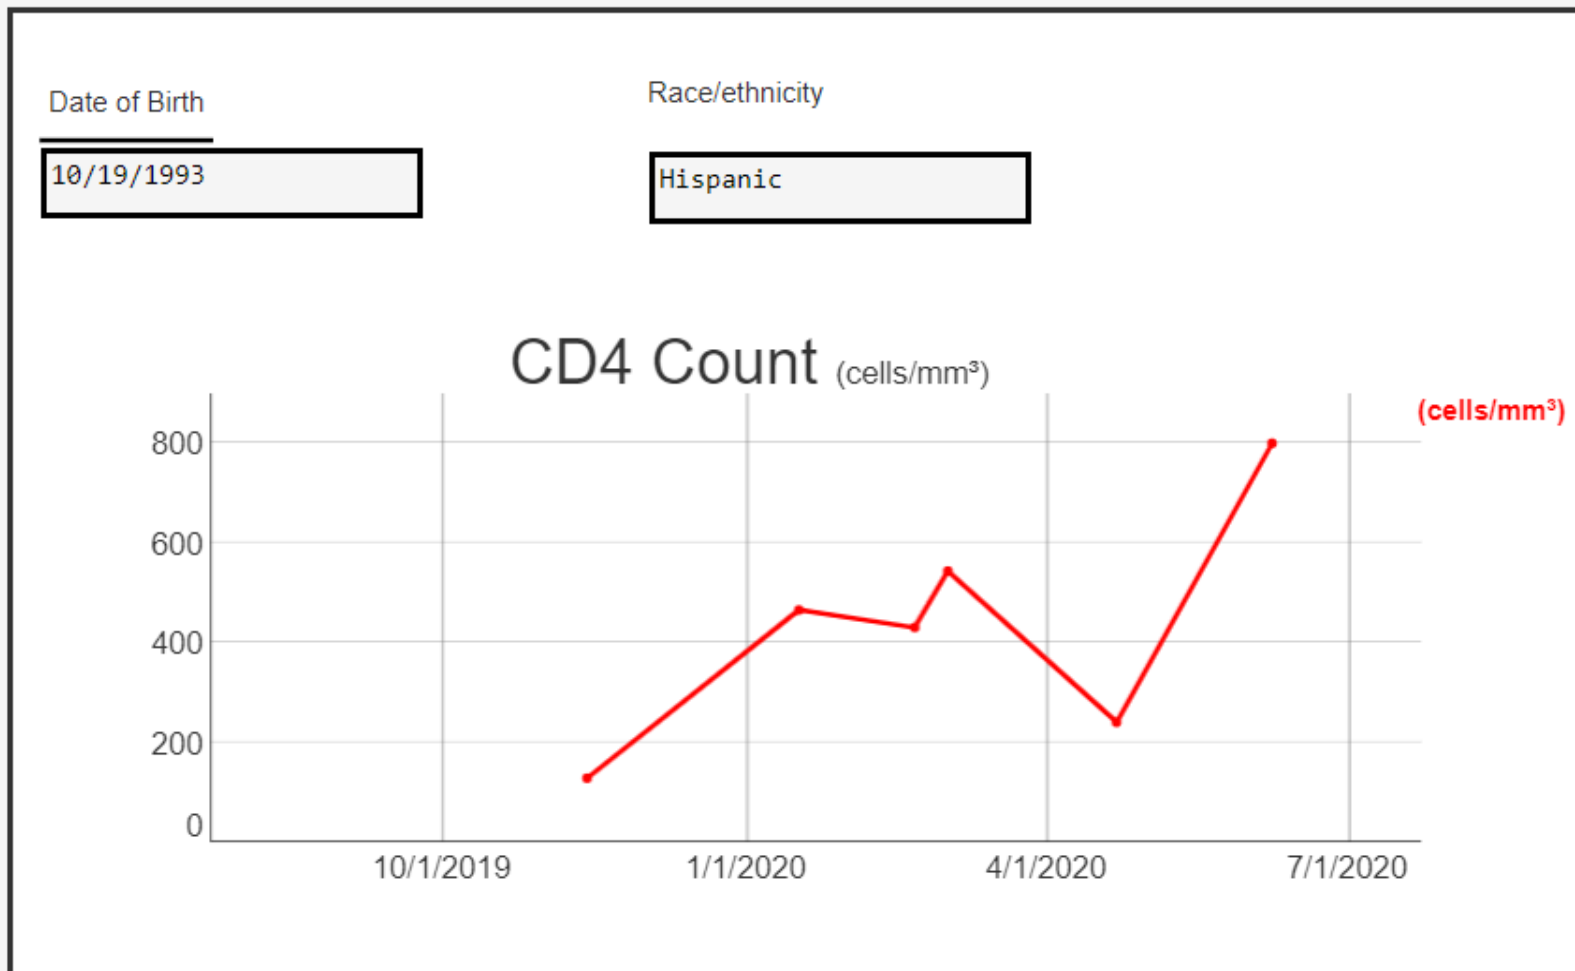

Streamlined data imports

- Consolidate data import functions in CAREWare
  - All mappings of imported values will be located in place, regardless of the type of file being imported (PDI, HL-7, CSV)

- Building tools to import from any major source with a known format

- Will include pre-mapped fields for major electronic Clinical Quality Measures (eCQMs) that are part of the Bureau of Primary Care's Uniform Data System PLS

  - Covering major codesets such as ICD-10, SNOMED, CPT, LOINC, RxNorm
  - Codes from these inputs will be mapped to native CAREWare coding for ease of use
