CONFERENCE
ON HIV CARE & TREATMENT

Project Support

This project and product was supported by Grant UT8HA33961 from the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS). Its contents are solely the responsibility of the authors and do not necessarily represent the official views of HRSA.

Background and Purpose

- The dashboard is utilized by the EHE program under the Tarrant County HIV Administrative Agency (TC HIV AA) located in Fort Worth (Tarrant County), Texas.
- Serves as an interactive analysis tool for (TC HIV AA) and subrecipients to track and monitor key performance metrics and indicators among clients enrolled in EHE.
- Demonstrates actionable insights and ensure continuous progress towards meeting goals.
- Addresses health outcomes and tracks progress among EHE subpopulations of focus (Black MSM, Black Women, Transgender, Youth aged 18-24).
- *This dashboard was created in collaboration with CAI TAP-in.*

Methods

Analytical Software

- Microsoft Power BI

Data Source

- Provide Enterprise (PE) Client Level Data System

Data Collection

- PE EHE Client Level Data Extract

EHE Metrics

1. HIV Care Continuum

- *Number of Newly Diagnosed*
- *Percentage Linked to Care*
- *Percentage Prescribed ART*
- *Percentage Virally Suppressed*

2. Number of Days from:

- *Diagnosis to Linked to Care*
- *Diagnosis to ART Prescription*
- *Diagnosis to Viral Suppression*

Evaluation and Performance Measures

The Tarrant County Ending the HIV Epidemic (EHE) Evaluation Framework is used to evaluate the jurisdiction's EHE strategies. This framework was created in collaboration with CAI TAP-in and addresses:

1. Evaluation Questions and Barriers

2. EHE Stratified Measures

- *Process Measures*
- *Program Measures (Short-Term and Medium-Term)*
- *Long-Term Measures*

3. Data Sources

4. Analytical Tools

5. Dissemination Mechanisms

6. Next Steps

Implications

Lessons Learned

- Ensure all metrics included on the dashboard are captured in the client level data system.
- Ask questions and be open to receiving valuable feedback from team and subrecipients.
- Ensure data quality is assessed routinely along with ongoing data mining and data cleanup.

Next Steps

- Ongoing technical support from CAI TAP-in to further refine the Newly Diagnosed dashboard as well as developing the Reengagement dashboard.
- Identify additional modifications to client level data system, PE, as needed.
- Share public facing dashboard.

Thank You!

CAI TAP-in, we appreciate all your help and assistance with these projects! 😊
