

# Overview, Reach & Responsiveness of SPNS

## TIMELINESS OF SPNS INITIATIVES IN RESPONDING TO NEEDS OF HIV POPULATIONS & CHANGING HEALTHCARE ENVIRONMENT

Opioid addiction treatment 

Integration of HCV treatment

HIT & data integration

 Practice Transformation

Social media strategies 

## ABOUT iHiP

IHIP, or Integrating HIV Innovative Practices, is a SPNS program dedicated to helping providers learn about and implement tested and proven HIV strategies. The practices outlined in IHIP have demonstrated success and replicability across health care settings and IHIP tools help support optimal implementation of successful models of HIV care.

Meets national goals including the HIV Care Continuum, an AIDS-free generation, and the SPNS mission

Accessed across the country, particularly in those 12 cities with the highest prevalence and in 14 international countries

TA tools on replicable, evidence-informed, care model interventions to meet provider needs including:

- implementation and training manuals
- curricula
- pocket guides
- case studies

Capacity building assistance

- training webinars
- informational resource listserv
- dedicated email TA help desk

# Meeting Federal Priorities

The SPNS program continues to be in a prime position to support the goals of the National HIV/AIDS Strategy, the HIV Care Continuum Initiative, the Affordable Care Act, and the Minority AIDS Initiative by providing training, education, and technical assistance to strengthening the integration and delivery of services and quality of care for people living with HIV.

## Advancing the HIV care continuum

SPNS has funded initiatives along the steps of the **HIV Care Continuum** including projects focused on:

## New HIV Care Continuum initiative

SPNS launched the “**Dissemination of Evidence-informed Interventions to Improve Health Outcomes along the HIV Care Continuum**” Initiative using an implementation science approach to study and produce evidence-informed, replicable, cost-effective, care and treatment interventions.

## SPNS Featured in National HIV Care Continuum Report

The “**Health Information Technology Capacity Building Initiative for Monitoring and Improving Health Outcomes Along the HIV Care Continuum**” was highlighted in a national publication. Also featured in the report is the “**Addressing HIV Care and Housing Coordination Through Data Integration to Improve Health Outcomes Along the HIV Care Continuum**” Initiative that focuses on the integration of Housing and Urban Development (HUD)/Housing Opportunities for People With AIDS (HOPWA) and Ryan White data systems to better assess housing’s impact on health outcomes.

## new iHiP HIV Care Continuum Resources!

*Improving Health Outcomes: Moving Patients Along the HIV Care Continuum and Beyond* features 10 SPNS interventions along the HIV Care Continuum as well as HIV/HCV coinfection strategies. Includes replication tips, case studies, care model steps at a glance, resource checklist, and capacity needed.

## Supporting the National HIV/AIDS Strategy

- ▶ *Publications on national HIV goals* cite demonstration projects as **fostering coordination and collaboration** across agencies.
- ▶ “**System Linkages and Access to Care for Populations at High Risk of HIV Infection**” Initiative coordinates critical components of federal, state, and local public health systems.
- ▶ SPNS “**System-level Workforce Capacity Building for Integrating HIV Primary Care in Community Healthcare Settings**” Initiative was named in a White House Office of National AIDS Policy **fact sheet** for its contributions toward achieving an AIDS-Free generation.
- ▶ SPNS “**Electronic Networks of Care**” Initiative receives national recognition.
- ▶ SPNS “**Enhancing Access to and Retention in Quality HIV Primary Care for Transgender Women of Color**” was included in the **HHS LGBTQ Coordinating Committee** highlights and the **White House consultation** on improving outcomes in the transgender community.
- ▶ SPNS was recognized in a national operational plan and implementation progress report as well as the **HHS implementation progress report** for its work on viral hepatitis coinfection, incarceration, homelessness, opioid treatment, leveraging of public health data, building a medical home for multiply diagnosed homeless populations, women of color, and more.

## Stay connected

### Sharing Information and Strategies

- ▶ **What’s Going on @ SPNS** bulletins
- ▶ SPNS **monographs and pocket guides**
- ▶ IHIP project training tools and Webinars

### Fostering collaboration

- ▶ Partnering with **AIDS Education and Training Centers (AETCs)**
- ▶ Sharing lessons learned with the CDC, HRSA Bureau of Primary Health Care, Department of Housing and Urban Development (HUD)/Housing Opportunities for People With AIDS (HOPWA), other federal agencies, and the HIV community at large
- ▶ Supporting **SAMHSA-HRSA Center for Integrated Health Solutions**
