	Looking Toward the Future	20

HealthHIV developed an assessment guide on behalf of the Integrated HIV/AIDS Planning Technical Assistance Center (IHAP TAC) to help integrated HIV planning bodies review and evaluate the effectiveness of their structure, policies and procedures, membership, and stakeholder and consumer engagement. For this process, "effectiveness" is defined by how well the planning body's structure, policies and procedures, consumer engagement and implementation supports its ability to carry out its mission and objectives. Through the comprehensive assessment, integrated HIV planning bodies are able to identify areas for improvement in order to develop more effective and efficient planning processes. The assessment process includes three phases:

- 1. Stakeholder Engagement
- 2. Assessment Implementation
- 3. Reflection and Solutions Development

#### **Logistics and Responsibilities**

The mixed-method assessment involves collecting and analyzing quantitative data via an anonymous, online survey and qualitative data via key informant interviews with stakeholders involved in integrated HIV planning. The assessment should engage all HIV planning body members and also may include other key stakeholders such as non-voting, ex-officio, former members, and state/local government representatives. Historically, people with HIV have used the phrase "nothing about us without us" to ensure a voice at the table for planning activities to address HIV/AIDS in their communities. HRSA/HAB has embraced this by requiring the participation of people with HIV in RWHAP Part A Planning Councils. It is important that this assessment include the voices of people with HIV.

The HIV planning body leadership facilitates the engagement of, and communication with, HIV planning body members and external stakeholders throughout the assessment process. Ideally, an unbiased third-party representative will administer the assessment tools and maintain the confidentiality of all assessment participants. The survey can be implemented via a web-based survey tool (e.g. SurveyMonkey) and the KII tool is designed to be implemented by phone, over video conferencing, or inperson. All responses should be reported in aggregate to protect confidentiality of individual HIV planning body members.

### Goal and Objectives

The goal of the assessment process is to review and enhance the HIV planning body's ability to carry out its mission by identifying key strengths and areas for improvement related to the effectiveness of its operating structure, policies and procedures, membership, and stakeholder/consumer engagement. The key objectives to be achieved are:

- » Conducting a mixed-method assessment of HIV planning body structure, policies/procedures, membership, and engagement;
- » Reviewing the identified areas for improvement, key recommendations, and model practices that may be implemented; and,
- » Presenting summarized data and its implications to HIV planning body members to determine priority areas, next steps, and adaptation and/or implementation of recommendations.

#### **Recommended Timeline**

The following chart outlines a timeline for the implementation of the assessment process spanning approximately 12-16 weeks.

KEY STEPS AND ANTICIPATED TIMELINE				
	Key Step	Responsible Party	Timeline	
PHASE 1 Stakeholder	Conduct kick-off call with planning leadership and key stakeholders to determine objectives and intended outcomes	Assessment lead and HIV planning body leadership	Weeks 1-2	
Engagement	Review planning body's written documentation (orientation, bylaws, membership information)	Assessment lead	Weeks 2-3	
	Identify contacts for key informant interviews (KIIs) and provide contact information	HIV planning body leadership	Weeks 2-3	
PHASE 2 Assessment	Adapt online survey and interview guide based on introductory call and written documentation	Assessment lead	Weeks 2-3	
Implementation	Review and approve online survey and interview guide for implementation	HIV planning body leadership	Weeks 4-5	
	Propose communication plan and strategies to engage and gain buy-in for assessment process	Assessment lead	Weeks 4-5	
	Distribute anonymous online survey (via planning body listserv) and field for two-three weeks	Assessment lead	Weeks 6-8	
	Conduct four to six 60-minute KIIs	Assessment lead	Weeks 6-8	
	Analyze and summarize survey and KII data	Assessment lead	Weeks 8-10	
PHASE 3 Reflection	Facilitate conference call to review initial findings with key stakeholders and leadership	Assessment lead and HIV planning body leadership	Week 11	
and Solutions Development	Finalize assessment report with recommended areas for improvement	Assessment lead	Weeks 12-13	
	Lead discussion (half-day, approx. 4 hours) with HIV planning body to present findings and facilitate identification/ prioritization of next steps for improvement	Assessment lead	Weeks 12-16	
	Identify next steps for follow-up technical assistance and/or training	Assessment lead	Post training	

## Phase 1. Engagement and Information Gathering

If a third-party is implementing the assessment, it is essential for that individual or agency to have a comprehensive understanding of the HIV planning body and its culture, membership, and environment. The Stakeholder Engagement phase of the assessment process should include conversations with HIV planning body leadership to outline the objectives and intended outcomes of the assessment; list documentation requests; gain clarification on planning body structure, policies, and procedures; and ensure full cooperation and clear communication with HIV planning body members regarding the assessment activity.

Background documentation may include:

- » Acronym guide/glossary of terms
- » Executive Board and committee lists
- » Conference and workshop attendance
- » Confidentiality contract
- » Conflict of interest disclosure form
- » Meeting protocols, including minutes
- » Membership application form
- » Member contact information
- » Membership years of service
- » Planning body bylaws orientation and mentorship (includes list of orientation materials)
- » Outreach events/activity form
- » Taskforce/ad hoc meeting summary
- » Timetable of tasks

The planning body assessment is conducted through a survey and individual key informant interviews (KIIs). The HIV planning body will implement the two assessment modalities concurrently: an *anonymous* online survey of the full planning body membership and phone interviews with a diverse group of six HIV planning stakeholders, including voting and non-voting members, government representatives, and facilitators/contractors.

#### Member/Stakeholder Survey

The purpose of the online survey is to provide the planning body with information for reflection, discussion, planning, and development to improve the group's practices, structure, and community engagement efforts. The anonymous survey data may show where planning members are in consensus, disagreement, or where there are significant outliers. Survey participants are asked to provide thorough, thoughtful, and truthful answers. All answers to the survey must remain anonymous and be reported in aggregate to protect the confidentiality of respondents.

The survey instrument includes 40 adaptable, closed- and open-ended questions related to: membership demographics and skills; planning body structure; the planning body's recruitment and orientation activities; relationship with external stakeholders; and key successes and areas for improvement.

## **Key Informant Interviews**

KIIs will further the participation and voice of the planning body's members in the assessment process. A diverse group of at least four to six members, including at least one person with HIV, should be asked to participate. A diverse set of perspectives may include both new and seasoned members, both government and community representatives, consumers, representatives of focus populations, process-leaders within the planning group or committee leads, planning body contractors, or planning meeting facilitators. The qualitative information from KIIs must be de-identified and aggregated for the reporting process. The KII tool consists of 28 adaptable, open-ended questions, which can be completed within 60 minutes, and includes discussion of member background, current engagement and role within the planning group, the purpose of the planning group and ability to fulfill its role, group membership, and future aspirations/anticipated challenges.

Data from the anonymous survey and KIIs are summarized and reported in aggregate, highlighting key findings and areas for consideration/discussion. While the assessment aims to identify areas for improvement, it also is important to highlight the successes and effectiveness of the planning body and its HIV planning efforts. When the survey demonstrates consensus or disagreement among members in areas related to planning body effectiveness, the KIIs should be able to provide the context and details to clarify or contextualize survey responses. For example, the survey may indicate that 90% of members believe the new member orientation process is "effective" and 10% (two members) believe the process is "ineffective." Not only would it be important to gain context for this disagreement in the KIIs, but it also should be a point of discussion when the data are presented to the membership. Why do two members disagree strongly with others? Are they simply outliers or is there a communication or process issue?

Some areas for improvement may focus on planning body structure, membership engagement and/or recruitment, community/consumer engagement, and monitoring and tracking activities. By examining the areas of improvement, a planning body will be able to engage in a discussion including specific strategies or recommendations to address improvements.

Ultimately, the assessment and subsequent discussion among HIV planning body members will lead to a better understanding of how to ensure and improve the planning body's effectiveness in supporting state and local ending the HIV epidemic planning.

## **Survey Guide**

The following survey is part of a mixed-methods assessment of your current HIV planning practices, structure, and stakeholder engagement efforts. This process will help your planning body better understand how to improve its effectiveness towards ending the HIV epidemic in your jurisdiction.

Participation and transparency in this assessment process is essential. This anonymous, online survey will collect responses from all members of the HIV planning body. All individual data and responses will remain completely anonymous.

(Optional Respondent ID - This is to make sure individual responses are only counted once.)

ID = Last Letter of First Name, First Letter of Middle Name, Day (XX) and Month (XX) of Birth

Example: Mary Kate Taylor born 04/23/1978 = YK0423

1.	In 1-2 sentences, share what ways your participation (as an individual) in the [planning body] makes an impact on the HIV epidemic in [your jurisdiction].
2.	List three ways the [planning body] (as a full body) is helping to end the HIV epidemic.
3.	What are the [planning body]'s greatest area(s) for improvement? List up to three.
4.	In your own words, what do you believe is the primary purpose of the [planning body]?
5.	What is your understanding of the relationship, scope, role and responsibilities of the [planning body] versus the government entity (i.e. state or local health department)?
6.	How has the [planning body] addressed issues or new priorities impacting people with HIV over the past 12 months into its activities (e.g. social justice, racial inequities, COVID-19, health policy issues)?

## **Planning Body Meetings**

7.	what (if anything) gets in the way of meeting efficiency at FULL planning body meetings? (Select all that apply.)
	OThere are no barriers that interfere with efficient council meetings.
	OThe meetings are too frequent.
	OThe meetings are too long.
	OThere is no agenda.
	OThe agenda is NOT provided in advance.
	• We don't follow the agenda.
	OThere is too much on the agenda for some items and not enough time for others.
	OThe purpose of the meeting is unclear.
	The purpose or objectives of the meeting are not met by the end of the meeting.
	OThere are too many tangents.
	OThere is no timekeeper.
	OSpeakers talk over one another.
	Meetings are dominated by a few voices.
	Other: (please specify other barriers)
8.	What (if anything) gets in the way of meeting efficiency at COMMITTEE meetings? (Select all that apply.)
	OThere are no barriers that interfere with efficient committee meetings.
	OThe meetings are too frequent.
	OThe meetings are too long.
	OThere is no agenda.
	OThe agenda is NOT provided in advance.
	OWe don't follow the agenda.
	OThere is too much on the agenda for some items and not enough time for others.
	OThe purpose of the meeting is unclear.
	OThe purpose or objectives of the meeting are not met by the end of the meeting.
	OThere are too many tangents.
	OThere is no timekeeper.
	OSpeakers talk over one another.
	Meetings are dominated by a few voices.
	Other: (please specify other barriers)

9.	While our country faces the COVID-19 pandemic, rank which meeting format you are most willing and able to participate in.
	Online, [virtual meeting platform] meeting with video conferencing
	Online, [virtual meeting platform]meeting without video conferencing
	OConference call
	Other, please specify and rank:
10.	Do you have a preferred virtual platform for meeting online?
	○No, I do not have a preference.
	○WebEx
	○Zoom
	OMicrosoft Teams
	○Google Meet
	○Skype
	Other, please specify:
11.	In an ideal world (post-COVID), rank which meeting format you are most willing and able to participate in.
	○In-person, all together
	OIn-person, with option to join via [virtual meeting platform]
	Online, web meeting with video conferencing
	Online, web meeting without video conferencing
	OConference call
	Other, please specify and rank:

12.	What barriers do you personally experience related to your participation in meetings? (Select all that apply.)
	OI do not feel that there are barriers to my participation.
	OLacking confidence in using virtual meeting platforms.
	Feeling as though members do not speak in inclusive ways (e.g. not defining acronyms, using overly-technical language).
	Feeling uncomfortable speaking as someone with less experience in HIV planning.
	OLacking confidence in understanding of how the [planning body] operates (e.g. how the planning body fits in with other HIV activities in the region, my role in the group, our relationship with government or funders).  OFFEELING UNCOMFORTABLE Speaking in front of a large group of people.
	Ostruggling to find a space in the conversation to speak up.
	Feeling that some members are condescending.
	Feeling left out of the loop about planning body activities.
	Feeling like no one cares about or values my participation.
	OParticipation and/or assignments are not equally distributed.
	Osensing tense and strained relationships among members.
	Other: (please specify other barriers)
13.	How significantly do these barriers impact your ability to participate in meetings?  Our significantly
	Somewhat significantly
	ONot very significantly
	○Not at all
14.	Are there specific areas or topics that you could use more training or skills building on to increase your engagement/participation in [planning body] meetings?
15.	What would you change about the [planning body] meetings to remove barriers to participation? (e.g. format, agenda, culture)

## **Policies and Structure**

16.	How well do you understand the contents of the bylaws, policies and procedures of the [planning body]?
	Overy poorly
	Osomewhat poorly
	Neither poorly nor well
	Osomewhat well
	○ Very well
17.	How confident are you in your ability to explain the mission and objectives of [planning body] to the community (i.e. non-members)?
	○Not at all confident
	ONot very confident
	ONeutral
	OModerately confident
	Overy confident
18.	What committee(s) do you participate in? (Select all that apply.)
	OI do not participate in any committee.
	○[list current committees as answer choices]
	Other, please specify name of committee:
19.	Would you recommend changing the current structure and function of any of [planning body]'s committees? Which, and how so?

## Membership

20. What is your role as a member?
Ovoting member
OAlternate
OCommittee-only member
Other, please describe:
21. How long have you been a member of the [planning body]?
Years or Months
22. Are you satisfied as a member of the [planning body]?
OYes, and I plan to finish out my membership.
ONo, but I plan to finish out my membership.
○No, and I plan to leave the [planning body] before my term ends.
23. If you are dissatisfied as a member, what is your primary reason?
24. List up to five skills or personal/professional experience that are missing from the current [planning body]
membership.

25.	What barriers exist that might interfere with [planning body] new member recruitment?				
	OAccessibility of outreach/recruitment information to the general public.				
	OLack of broad outreach/recruitment efforts.				
	Oconfusion/lack of understanding about what the [planning body] is.				
	Oconfusion/lack of understanding about expectations and responsibilities for members.				
	Oconfusion about the application process (timeline, etc).				
	OTime commitment for members.				
	Olnsufficient compensation for participation.				
	Oconfusion about whether someone is eligible to apply.				
	There are no barriers that currently exist.				
	Other:				
26.	How well does new member orientation prepare you to fully participate in [planning body] activities/				
	committees and understand their expected roles and responsibilities?  Overy Well				
	committees and understand their expected roles and responsibilities?				
	committees and understand their expected roles and responsibilities?  Overy Well				
	committees and understand their expected roles and responsibilities?  Overy Well  Well				
	committees and understand their expected roles and responsibilities?  Overy Well  Well  Fair				
	committees and understand their expected roles and responsibilities?  Overy Well Owell Fair Opoor				

27.	Do you believe the [planning body] actively engages new members into planning activities in the first 1-2 months following orientation?
	○Yes
	Somewhat
	○No
	Ounsure
	(Optional) What could be improved about the new member orientation?
C	ollaboration and Impact on the HIV Epidemic
	Masoration and impact on the rife Epiderine
28.	Does the [planning body] as a whole adequately (Select all that apply.)
	Oconduct adequate needs assessments with impacted communities.
	Ouse data to support decision-making.
	Ocommunicate effectively with the communities impacted.
	Ocommunicate effectively with other partners (i.e. state and local health organizations, etc).
	Reflect the demographics of the communities most affected by HIV.
	Address disparities linked to social determinants of health like poverty, unequal access to health care, lack of education, stigma, and racism.
	Monitor and evaluate achievement of Integrated HIV Prevention and Care Plan objectives.
	Evaluate the effectiveness of the council's own HIV planning activities.
	Assess the efficient administration of HIV funding in the state.
	None of the above.
29.	The [planning body] could improve communication and collaboration with the following groups:
	State Health Department
	Ryan White Part A recipient(s)
	ORyan White Part B recipient
	Other city/county health departments
	Community- and clinic-based providers of HIV prevention
	Other planning bodies in the region/state
	The [planning body] does not need to improve communication/collaboration with external stakeholders.

Oporty Osomewhat poorly Osomewhat poorly Osomewhat well Owell Optional) What can be improved about the [planning body] incorporation of community voices? 	○Yes, transgender man
	○Yes, transgender non-binary
	○No
	OPrefer not to say
39.	How would you describe the area you primarily live in?
	Ourban
	OSuburban
	○ Rural
<b>40.</b>	What other skills, not listed above, such as lived experience, do you bring to the [HIV planning body]?

## **Key Informant Interview Guide**

The following key informant interview (KII) guide is part of a mixed-methods assessment of your current HIV planning practices, structure, and stakeholder engagement efforts. This process will help your HIV planning body better understand and improve its role in ending the HIV epidemic. Your participation and voice in this assessment process is essential. We will be conducting several key informant interviews and administering an anonymous, online survey to collect feedback.

You have been selected as a key informant interviewee. Please let me know when you are available for a 60-minute phone interview between the dates of \_\_\_\_ and \_\_\_. All information collected during your interview will be de-identified and reported in aggregate to ensure your confidentiality. We value your honesty and transparency in this process.

### Demographics/Background

1. What is your current title/role?

### Current Role/Engagement with [HIV planning body]

- 2. Why did you choose to join the planning body?
- 3. How would you describe your understanding of HIV planning and your role?
