

## Replicating Innovative HIV Care Strategies in the Ryan White HIV/AIDS Program

Maricopa County Jail Project

Providing services to people with HIV who are justice-involved September 28, 2022

## Agenda

### • Project Overview

- About the Special Projects of National Significance (SPNS) Program & Integrating HIV Innovative Practices (IHIP) Project – presented by: Shelly Kowalczyk (MayaTech)
- Intervention Overview
  - Maricopa County Jail Project– presented by: Carmen Batista
- Q&A
- Participant Feedback

## About the Project

- Funded By: The U.S. Department of Health and Human Services, Health Resources and Services Administration's HIV/AIDS Bureau through RWHAP Part F: Special Projects of National Significance.
  - o HRSA oversight provided by: Melinda Tinsley and Adan Cajina
- Awarded To: The MayaTech Corporation
  - Subcontractor: Impact Marketing + Communications
  - Contract Period of Performance: September 27, 2021 September 26, 2023
- Purpose: To support the coordination, dissemination, and replication of innovative HIV care strategies in the Ryan White HIV/AIDS Program (RWHAP) through the development and dissemination of implementation tools and resources.

### Enhancements to the Integrating HIV Innovative Practices Project

- Focusing on RWHAP innovative strategies in HIV care and treatment (not just SPNS innovations)
- Aligning with the Best Practices Compilation
- Coordinating the delivery of peer-to-peer capacity building technical assistance (TA)
- Delivering one-on-one TA in the development and dissemination of implementation tools and resources

## Key Support to RWHAP Providers

- Implementation tools and resources
- Capacity building TA webinars
- Peer-to-peer TA on the featured interventions
- Support in the development and dissemination of implementation tools and resources
  - $\circ$  Webinars
  - $\circ$  One-on-one TA
- Helpdesk <u>ihiphelpdesk@mayatech.com</u>

## **Disclosures and Disclaimers**

#### **Disclosure of Unlabeled Use**

This educational activity may contain discussion of published and/or investigational uses of agents that are not indicated by the FDA. The planners of this activity do not recommend the use of any agent outside of the labeled indications. The opinions expressed in the educational activity are those of the faculty and do not necessarily represent the views of the planners. Please refer to the official prescribing information for each product for discussion of approved indications, contraindications, and warnings.

#### **Disclaimer**

Participants have an implied responsibility to use the newly acquired information to enhance patient outcomes and their own professional development. The information presented in this activity is not meant to serve as a guideline for patient management. Any procedures, medications, or other courses of diagnosis or treatment discussed or suggested in this activity should not be used by clinicians without evaluation of their patient's conditions and possible contraindications and/or dangers in use, review of any applicable manufacturer's product information, and comparison with recommendations of other authorities.

## Disclosure of Conflicts of Interest

Postgraduate Institute for Medicine (PIM) faculty, planners, and others in control of educational content to disclose all their financial relationships with ineligible companies. All identified conflicts of interest (COI) are thoroughly vetted and mitigated according to PIM policy. PIM is committed to providing its learners with high quality accredited continuing education activities and related materials that promote improvements or quality in healthcare and not a specific proprietary business interest of an ineligible company.

The faculty reported the following relevant financial relationships with ineligible entities related to the educational content of this CE activity:

### Disclaimer

This project was supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under grant #H8911478 Ryan White Part A HIV Emergency Relief Grant Program at \$10,455,209 and #UT833944 Ending the HIV Epidemic: A Plan for America – Ryan White HIV/AIDS Program Parts A and B at \$3,148,214 to Maricopa County, Arizona. No non-governmental sources were used to finance this project. This information or content and conclusions are those of the author and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.

### Presenter, Carmen Batista

Carmen Batista is the Ryan White Part A Program Manager for the Phoenix EMA which includes Maricopa and Pinal Counties. She received her bachelors and master's degrees in Public Health from the University of Arizona.

Carmen grew up in Ryan White, starting her public health career in 2007 as the Ryan White Part A Data Management Assistant responsible for all the consumer satisfaction surveys. She moved into various quality management positions and then Ryan White administration focused roles. She spent two and a half years as Arizona's Ryan White Part B and ADAP director. Carmen then took a break from HIV work to be Arizona's Office Chief of Chronic Disease and then returned home to Maricopa County to lead their Part A and Ending the HIV Epidemic programs.

Carmen is known for having hope in the capacity to end the HIV epidemic, client-centered approaches, innovative and integrated eligibility projects, and as a champion of lived experiences and inclusion.

### **Coordinated System of Care – Keys to Success**

- Maricopa County is the 4<sup>th</sup> largest County in the country
- Maricopa County Department of Public Health is the Ryan White Part A recipient and an EHE Ryan White recipient
- Approximately 4,500 Ryan White clients annually
- Average between 70 and 100 PWH in the jails on a daily basis
- Offered HIV Opt-out testing initiative since 2013

   Initially paired with case management and then medical services, after approval

# "Correctional health is public health"

# ~Dr. Alvarez

### **Overview of Maricopa County Jail Project**

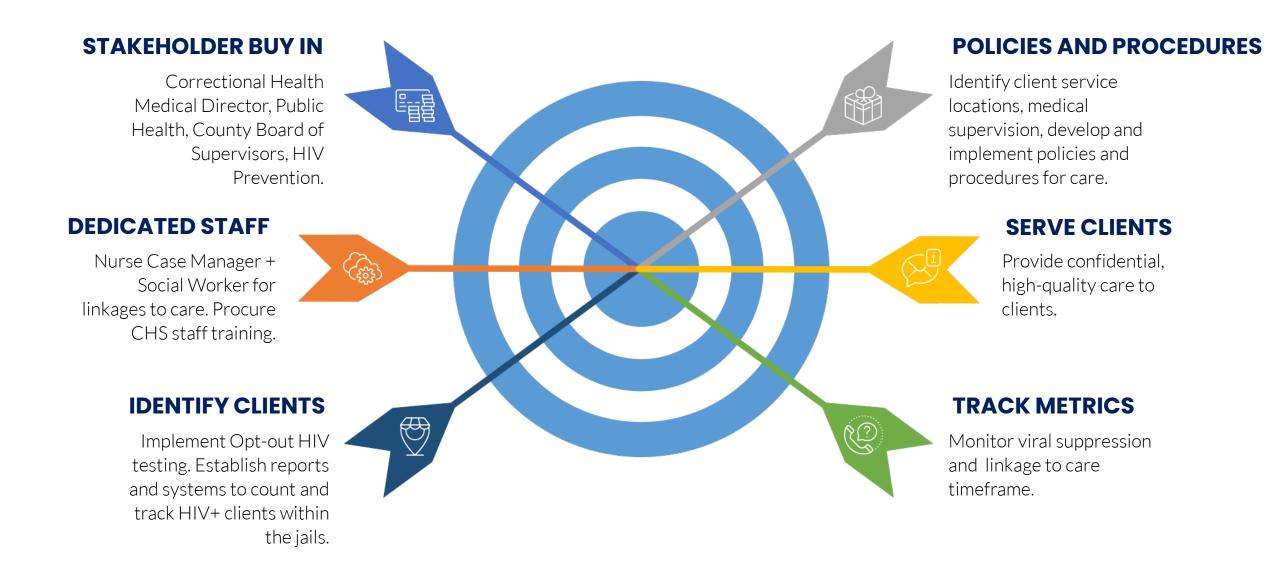

- HRSA-funded Ryan White and EHE programs
- Addresses HIV health outcomes for justice involved populations
- Partnered with Correctional Health Services and Public Health prevention staff
- Created new data communication systems and bundled services for clients upon release
- Funding prescribing staff within correctional system has expedited linkage to care times and significantly improved viral suppression rates

### Maricopa County Jail Project Purpose/Goals

- Implement opt-out HIV testing in a jail-based setting
- Decrease linkage to care time for people with HIV within a correctional environment
- Improve viral suppression rates among justice involved populations
- Improve linkage to care after release to the community

### **Reaching Our Goals**

Maricopa Jail Project

### **Intervention Model - Stakeholders**

**Ryan White Part A/EHE** Funder & Providers

Pay for dedicated Nurse Practitioner and Social Worker staff. Do not duplicate services in alignment with PCN 18-02. Secure HRSA approval.

#### Correctional Health Services Partner & Co-Funder

Pay Medical Assistant staff for blood-based HIV tests during assessments, provide medical supervision, staff training.

#### **Public Health**

#### **Co-Founder**

Process HIV tests, coordinate notifications of newly diagnosed individuals, partner services.

#### Clients

#### **Co-Founders**

Consent to treatment. Participate in partner services interviews. Provide information about needs and challenges.

## **Challenges and Solutions**

### **CHALLENGES**

- Challenging to get buy-in for jail-based HIV opt-out project. Concerns regarding treatment costs.
- Correctional Environments are physically intimidating and have unique safety requirements.
- New data systems can make it difficult to identify patients and track who's in jail.
- Released clients' 1<sup>st</sup> priority is often NOT connecting to medical care.

### SOLUTIONS

- Send medical people to engage Medical Director as a champion before expanding to other stakeholders.
- Use existing Correctional Health training and hire strong, independent, solution focused staff.
- Dedicate staff time to identify clients and create systems for follow up.
- Address immediate needs such as emergency housing, food, and employment with external staff.

## Challenges in *Depth*

### Administrative:

- Ensuring that services are not duplicated, per PCN 18-02
- Understanding payor of last resort differences between jails and prisons
- Approval for Memorandum of Understanding
- Medication costs
- Defining metrics to track

### **Clinical/Programmatic:**

- Needed new policies and protocols for providers
- Jail clients can be released at any time
- Clients can disappear after release
- Identifying housing after release
- Client confidentiality

### Facilitators of Success in Depth

- Data systems and reports
- Coordinated system of care
- Right staff with the right training
- Strong stakeholder engagement
- Emergency gap lodging

## Adding EHE Jump Start Program

### **Problem:** Maricopa County struggled to link clients to care after release from jail

- Clients had other priorities besides accessing medical care
- Some patients were homeless
- Contact information didn't connect
- Jail-based staff didn't have time to meet clients outside of the jail
- And more...

<u>Solution Step 1</u>: Engaged Public Health Communicable Disease Investigations Leadership to identify opportunities to partner

#### Solution Step 2: Paperwork

- ✓ Developed interdepartmental agreement and budget to staff a Social Worker position within the Communicable Disease Investigation Unit
- ✓ Updated Memorandum of Understanding between the programs

## Adding EHE Jump Start Program (con't)

### **Solution Step 3**: Developed policies and procedures about how the programs would work together

✓ Shared electronic spreadsheet to communicate client status and who was currently in the jail or leaving

### **Solution Step 4: Engaged all Stakeholders to address gaps**

- ✓ Additional communication and refinement of the initial HIV notification process
- ✓ Adapt to lower staffing levels related to COVID-19 pandemic

### **Solution Step 5: Care Coordination**

- ✓ Joint visits brought the most success. Laptop for notes has also expedited services!
- ✓ Develop client release plan and potential resource bundles to engage in care

### Solution Step 6: Sustainability

✓ Integrating into RWHAP and EHE funds

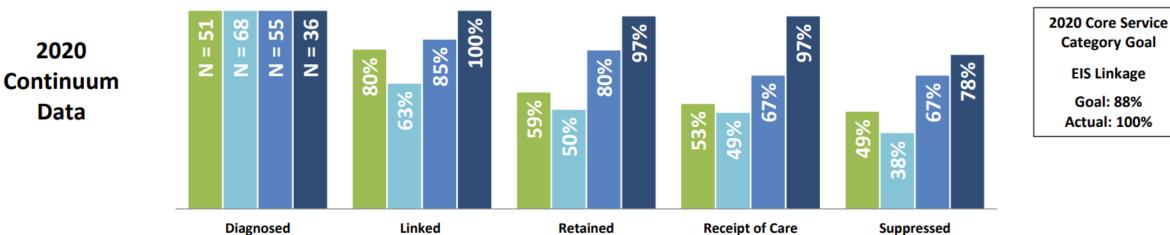

### Outcomes

### Maricopa County Jail Project

#### Year to Year Continuum

■ 2017 ■ 2018 ■ 2019 ■ 2020

## Client 1 Testimonial

"Thank you so much for listening to me about wanting to change my 2-pill regimen to 1 pill daily. I feel so much better on the new medication."

# Client 2 Testimonial

" I never trusted anyone before, but you showed me kindness." So, I will start taking my medication."

# **Client 3 Testimonial**

Letter received from a prior patient that is now incarcerated in Prison. "Ms. Quinn, you were so helpful when I was at Maricopa County Jail, I am hoping you can give me information for resources when I am released from prison."

## **Sustaining the Gains**

- Use grant funds to support ongoing continuing medical education
- Identify at least two staff one with an internal medical focus, and one with an external focus
- Support succession planning by bringing on junior staff
- Monitor test numbers to identify when re-training HIV testing staff
- Maintain a data reporting system to be used in evaluating this process and sharing with other facilities
- Leverage EHE funding to add staff that is focused on securing linkage after release

### Lessons Learned & Recommendations

- Let clients help inform a bundle of client valued services (emergency housing, food voucher, clothing) to encourage connection after release
- 2. Established processes will need tending over time retraining of staff for HIV test messaging
- 3. Budget for laptops to take notes
- 4. Figure out how to accept collect calls from jail
- 5. Build strong relationships and celebrate success so that stakeholders are open to addressing gaps and overcoming barriers
