

Completing the EHE Triannual Provider Report - Written Q & A Summary

September 6, 2023

#	Questions	Answers
1.	How do we confirm access to the Provider RSR for EHE?	If you are a provider only organization with your account set up correctly in the HRSA Electronic Handbooks (EHBs) , and linked to your organization, you don't need to do anything additional to get access to the EHE Triannual Report versus the RWHAP Services Report (RSR). Once your account is linked to your organization, you should have access to both reports. Please follow up with RWHAP Data Support if you are a provider organization and do not have access to either report.
2.	Can more than one person from our organization enter data for the report? Or is it only one person designated to enter data for the report?	Anyone from your agency with access to the report can work on it. Please note that you should only be able to have one person working on the report at a single time.
3.	Can you explain prescribed ART again? Do we report it for all of our clients if we have the information?	You only report on prescribed antiretroviral therapy (ART) for clients served during the reporting period that were either prescribed ART by your organization or continued on ART.
