

Preparing for 2024 AETC Submission - Written Q & A Summary

June 5, 2024

#	Questions	Answers
1.	Can you say more about what you mean by “schema issue”?	A schema issue pertains to anything in the Participant Information Form (PIF) CSV file, Event Record (ER) CSV file, or the Participant List (PL) CSV file that doesn’t align with the file template, or the coding requirements outlined in the AETC Codebook. For example, PIF 7 gender assigns a numeric character in the Codebook to each gender option. However, if the file used “M” for “Man” instead of the prescribed “1”, this would result in a schema issue.
2.	Can you review the submission timeline?	The system will open on July 12 th and the submission is due on September 15 th .
