

CDC/HRSA Advisory Committee on HIV, Viral Hepatitis, and STD Prevention and Treatment Meeting

Panel 4: Overcoming Barriers to Re-Engage People with HIV Out of Care

October 22, 2024

Paul Mandsager, MSPH
Senior Advisor, Division of Policy and Data
HIV/AIDS Bureau (HAB)

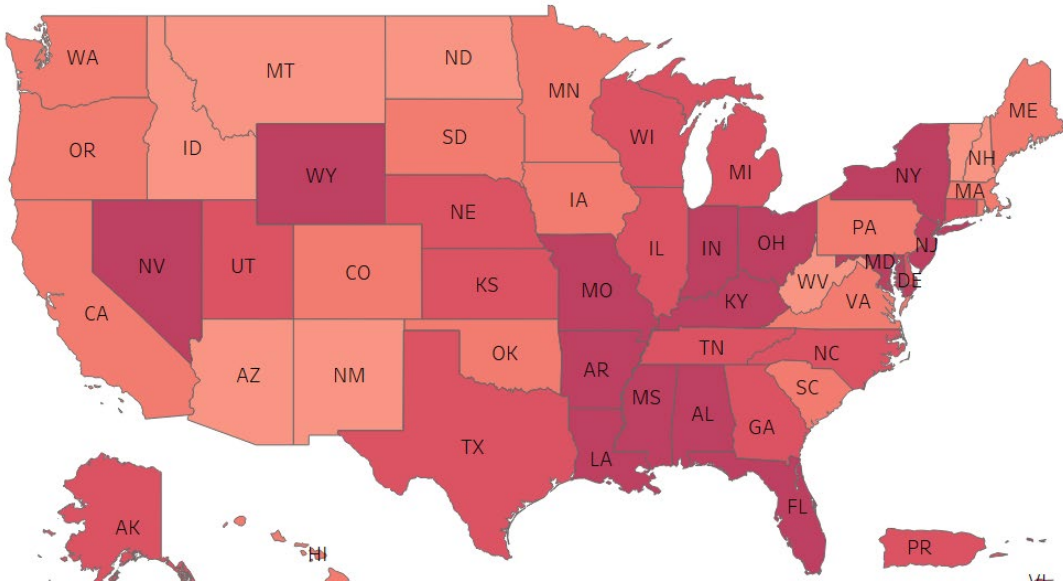

Vision: Healthy Communities, Healthy People

Ryan White Program 2030

Viral Suppression among Ryan White HIV/AIDS Program Clients by State, 2010 and 2022—United States and 2 Territories^a

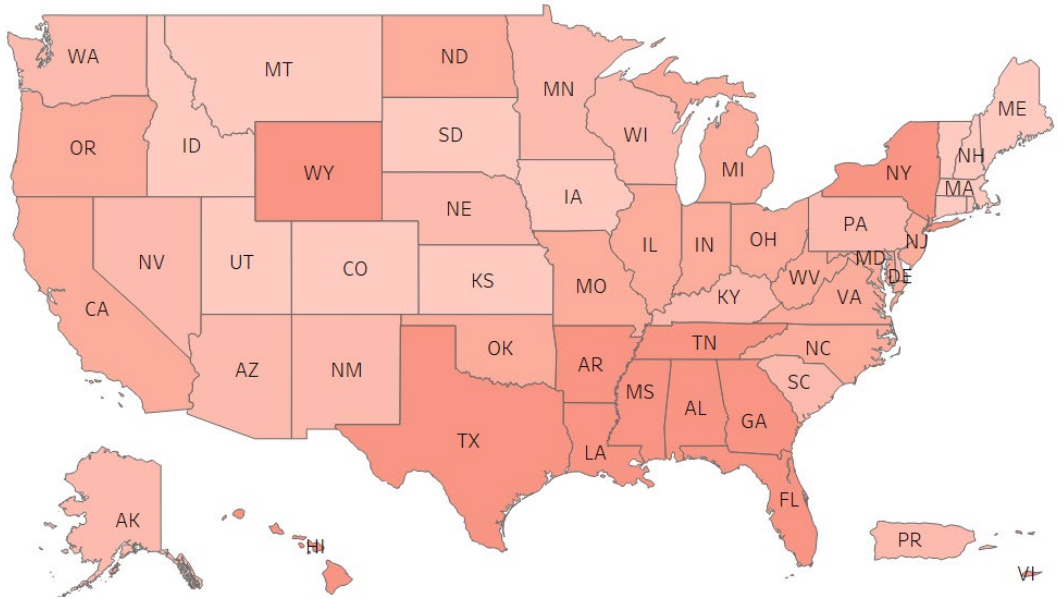

IN 2010
69.5%
VIRALLY SUPPRESSED

IN 2022

89.6%
VIRALLY SUPPRESSED

^a Puerto Rico and the U.S. Virgin Islands.

Achieving the Ending the HIV Epidemic in the U.S. (EHE) Goals

People with HIV in care

- Improve viral suppression rates
- Decrease disparities

People newly diagnosed with HIV

- Enhance linkage to care
- Enhance engagement in care

People with HIV out of care

- Expand re-engagement in care
- Improve retention in care

Improving HIV Health Outcomes and Reducing Disparities: Drivers to Success

**Gaining new insights
into the barriers faced
by people with HIV**

**Expanding the reach of
clinics into the
community**

**Identifying and
spreading evidence
informed interventions
and best practices**

**Developing policies
that promote access to
HIV care and treatment
services**

**Expanding the capacity
of the HIV healthcare
workforce**

HRSA HIV/AIDS Bureau (HAB) EHE Initiative Data: 2022

CLIENTS SERVED IN EHE JURISDICTIONS

The majority of new HIV transmissions come from people who are not aware they have HIV or are not receiving any HIV care.¹ In 2022, HAB EHE-funded providers served

22,001

clients new to care

19,204

clients estimated to be re-engaged in care²

This is nearly double the number of new and re-engaged clients served in 2020.

In Year 3 of the EHE initiative **alone**, approximately 15% of people in EHE jurisdictions who were undiagnosed or not in care were brought into care and served by HAB EHE-funded providers,³ compared with approximately 20% in the first two years **combined** of the EHE initiative.

EHE funding reached people with HIV who were new to care or not engaged in care by

Delivering rapid antiretroviral therapy services

Addressing social determinants of health, including housing, mental health, and substance use

Supporting client navigation through community health workers and peer support

Developing the HIV workforce, including people with lived experience

¹ Centers for Disease Control and Prevention. Vital Signs: Ending the HIV Epidemic—HIV Treatment Is Prevention. <https://www.cdc.gov/vitalsigns/end-hiv>.

² Estimated based on numbers of total clients served, new clients, and existing clients reported by outpatient ambulatory health services, medical case management, non-medical case management, and EHE initiative service providers.

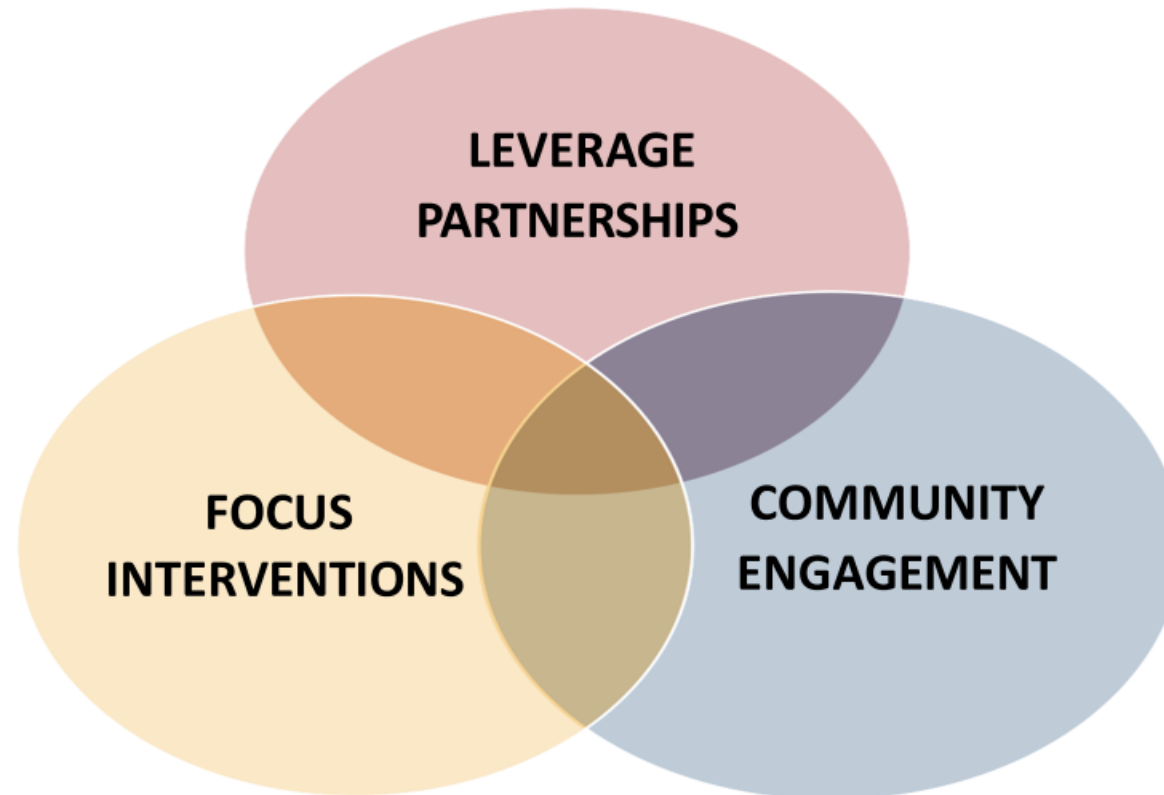

³ Individuals may be counted in multiple years and percentages are not intended to be summed across years. Centers for Disease Control and Prevention. NCHHSTP AtlasPlus. <https://www.cdc.gov/nchhstp/about/atlasplus.html>. Accessed June 6, 2024.

Ryan White Program 2030: Vision

HRSA HAB's vision of optimal HIV care and treatment for all to end the HIV epidemic in the U.S. calls us to focus on:

REACHING PEOPLE WITH HIV WHO ARE OUT OF CARE

Panel Presenters

- **Bobby Bangert, Whitman-Walker Health**
- **June Gipson, My Brother's Keeper, Inc.**
- **Veronica Ross, University of Virginia Health**
- **Everlyne Sawyer, University of Virginia Health**
