

# Creating a

# for Health Data Collection

THE FAMILY CENTER 

# Disclosure Information

## Grants/ Research Support

- In addition to our support from Ryan White Part D, The Family Center's Project SWEL was supported with funding from the Pfizer Foundation's ConnectHIV initiative (April 2007 to March 2010).

# Learning Objectives:

By the end of this session participants will be able to:

- Identify barriers to collecting health care status indicators.
- Utilize specific tools from the TFC community collaborative model.
- Identify two new ways to collaborate with other agencies to facilitate the gathering of client data.

# WHY Share Data?

- Strengthens continuum of care
- Adds value for clients and practitioners
- Target services to reduce duplication
- Early warning of problems
- Improves consumer outcomes
- HRSA/HAB mandate

# Barriers to Sharing Data

- Too much work
- Takes a lot of time
- Incompatible systems
- HIPAA Consent issues
- It's OUR Data

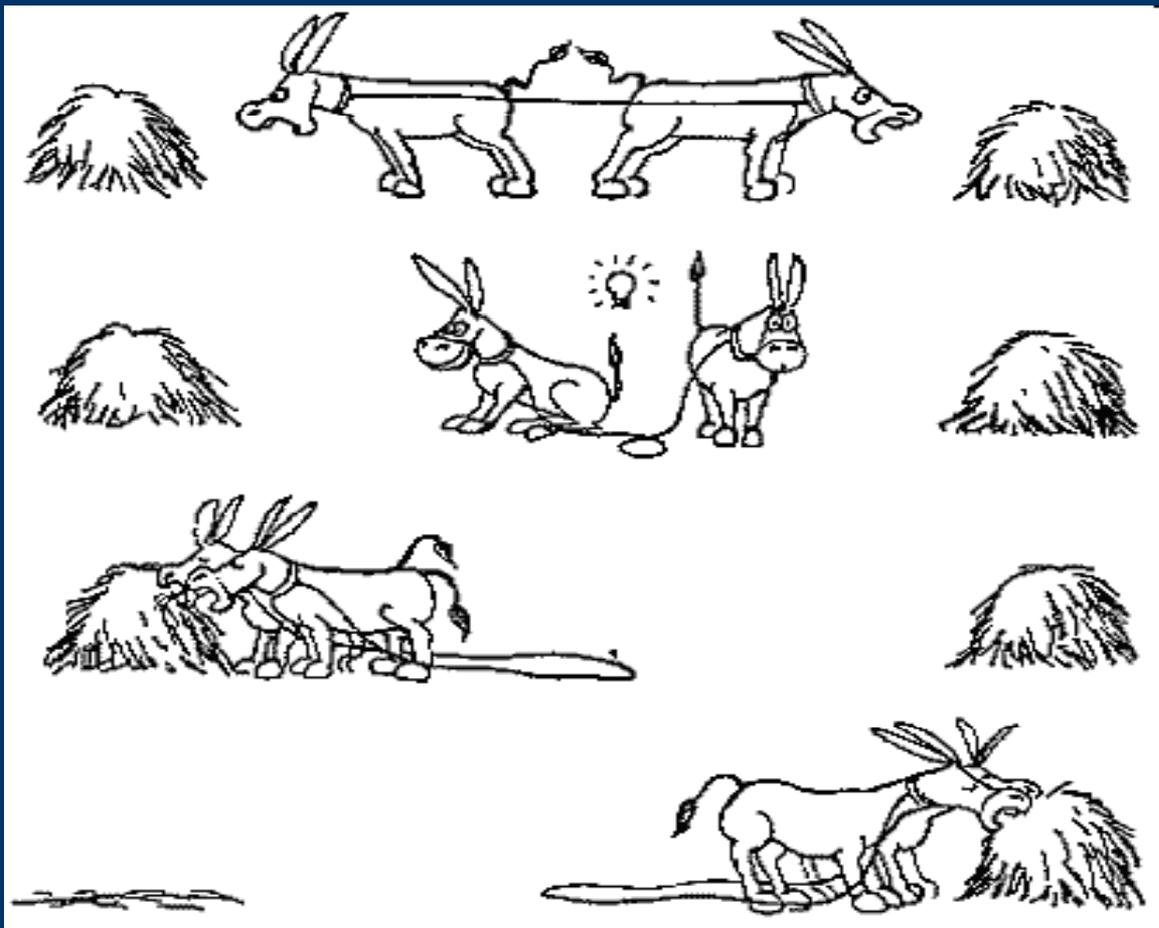

# Electronic Health Records: The Promised Land

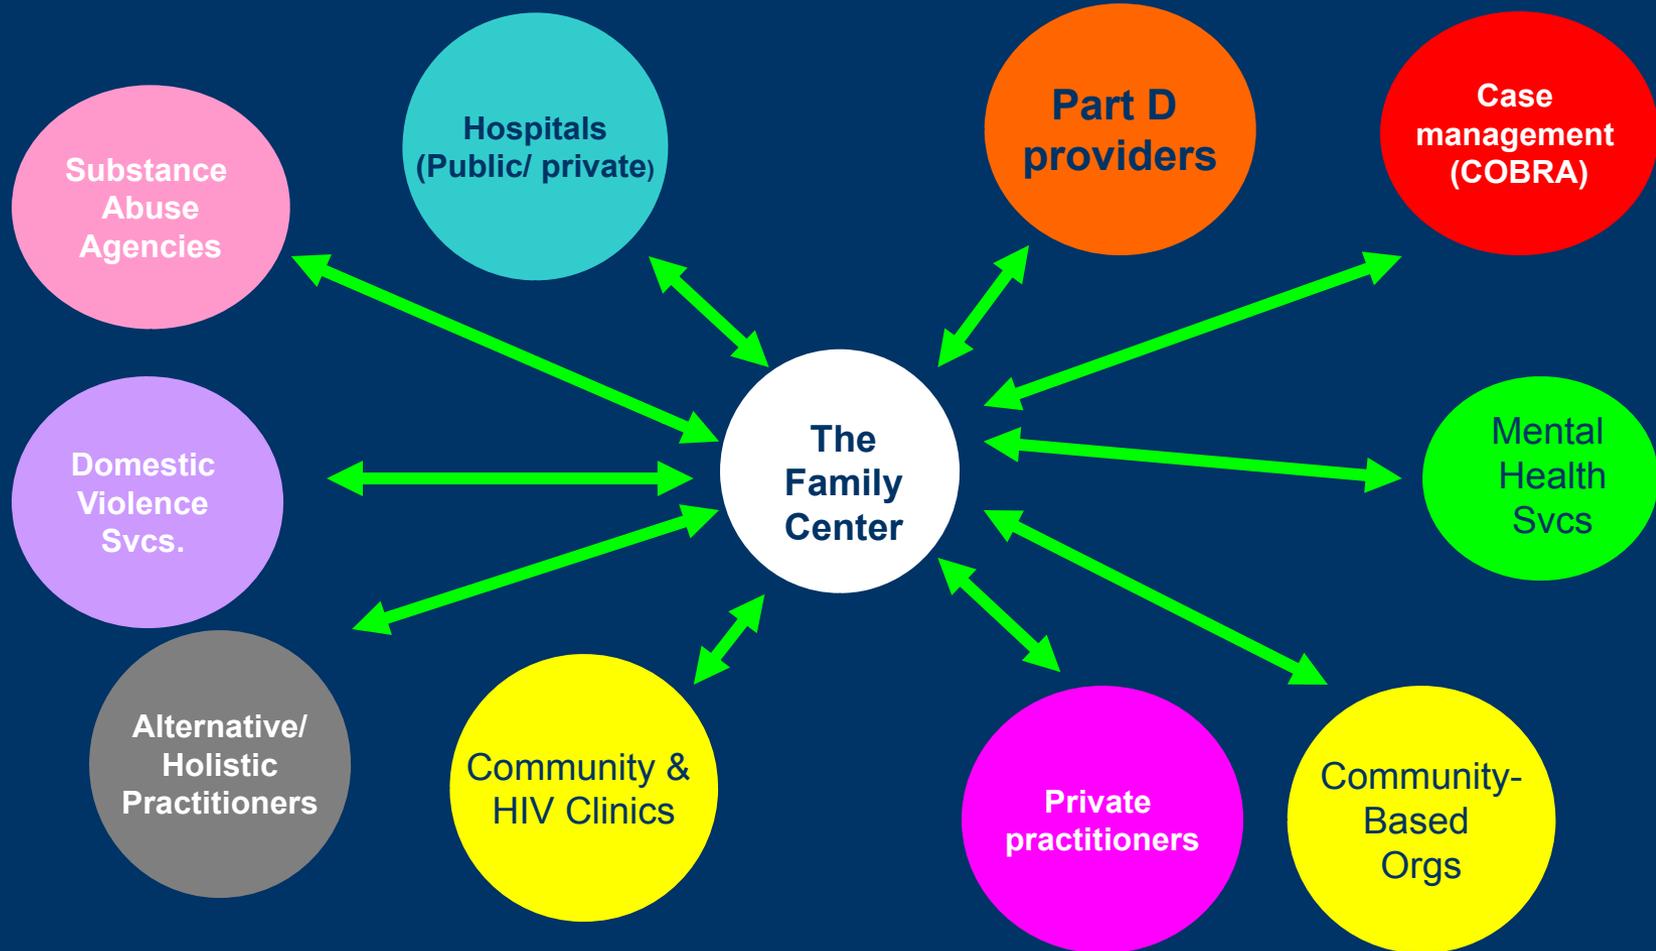

- Data interchange protocols not standardized
- Not universal
- Not fully interoperable
- Remains a work in progress

# Until Then.... New Times Require New Solutions

# WHERE Do You Sit in Continuum of Care Network?

# WHAT Are You Sharing?

## HAB Core Indicators collected at TFC

Group 1 "Foundation"	Group 2- "Seriously Consider"	Group 3 "Best Practice"
HAART	Lipids	Hep B
Med Visits	Hep C	Hep/ HIV alcohol counseling
ARV & Pregnancy	Pap smears	Mental Health screening
CD4 / CD4 % Viral Load	TB screening	Substance use Screening
PCP Prophylaxis	Adherence	Tobacco Cessation
		Alcohol counseling
		Vaccinations
		MAC prophylaxis

# Multi-tiered approach

Visit providers

Medical Assessment

# Targeting effort: WHAT'S in? WHAT Do We Need to Get? WHO Do We Need to Talk To?

Client ID	MEDICAL		
	HIV status	* HIV lab due dates	Med coverage
4-2990A	HIV+	9/3/2010	Medicaid
4-4760A	HIV+	8/18/2010	Medicaid
4-4730A	HIV+	10/27/2010	Medicaid
3-9520A	HIV+	9/2/2010	Medicaid
3-6610A	HIV+	Due in six weeks 8/2/2010	Medicaid
2-7020A	HIV+	11/15/2010	Medicaid
2-5310A	HIV+	11/15/2010	Medicaid
4-2550A	HIV+	Overdue 6/11/2010	Medicaid
4-2553	HIV+	10/13/2010	Medicaid/Medicare
4-2554	HIV+	10/13/2010	Medicaid
4-3230A	HIV+	9/10/2010	Medicaid
4-6670A	HIV+	10/11/2010	Medicaid
4-6890A	HIV+	No data for this client	Medicaid
4-6110A	HIV+	Due in six weeks 8/10/2010	Medicaid/Medicare
4-4820A	HIV+	Overdue 7/11/2010	Medicaid
4-4822	HIV+	9/10/2010	Unknown

# Data Sharing: A Two-Way Street

# Key Lessons:

- New context: Data sharing benefits everyone
- Multiple open channels work better than one
- Build personal, not just formal, relationships
- Some handshakes are more complex than others
- Flexibility counts
- Be persistent
- Create win-win sharing

# Our appreciation to:

- HRSA/HAB for setting standards, supporting our innovations and much feedback on the path
- Pfizer Foundation's ConnectHIV, for funding to design and refine our systems
