

Integrated Funding

Karen Robinson and Michael Barnes

Washington State Department of Health

Disclosures

Karen Robinson and Michael Barnes have no financial interest to disclose.

This continuing education activity is managed and accredited by AffinityCE/Professional Education Services Group in cooperation with HRSA and LRG. PESG, HRSA, LRG and all accrediting organization do not support or endorse any product or service mentioned in this activity.

PESG, HRSA, and LRG staff as well as planners and reviewers have no relevant financial or nonfinancial interest to disclose.

Commercial Support was not received for this activity.

Learning Objectives

At the conclusion of this activity, the participant will be able to:

1. Learn how to implement integrated HIV care and prevention services in community-based and local health partner settings
2. Consider lessons learned, considerations, and next steps associated with integrating prevention and care funding streams
3. Explore strategies for moving to embracing opportunities for care and prevention integration

Obtaining CME/CE Credit

Strategic Framework

End AIDS Washington provided the foundation for Integrated Planning

Planning Process

- Investment by the Department of Health's (DOH) and the Seattle TGA's HIV Prevention and Care Service Delivery System

END AIDS Initiative

- Investments required by multiple systems

Integrated Planning and End AIDS share five goals and twelve strategies

End AIDS Washington

- Reduce new HIV Diagnosis by 50%
- Increase Viral Suppression to 80%
- Reduce HIV-related Mortality by 25%
- Reduce HIV Health Disparities
- Improve Quality of Life

Strategies

- Reduce stigma
- Community mobilization of persons living with HIV (PLWH) and persons at high risk (PAHR) in Black and Hispanic communities
- Implement routine HIV screening
- Increase access to transmission barriers including PrEP and condoms
- Improve Healthcare for Sexual Minorities
- Improve prevention and care for substance users
- Reduce insurance barriers for PLWH & PAHR
- Increase housing options for PLWH
- Increase PLWH & PAHR engaged in comprehensive healthcare
- Improve sexual health education
- Community engagement of PAHR & PLWH communities
- Data to care

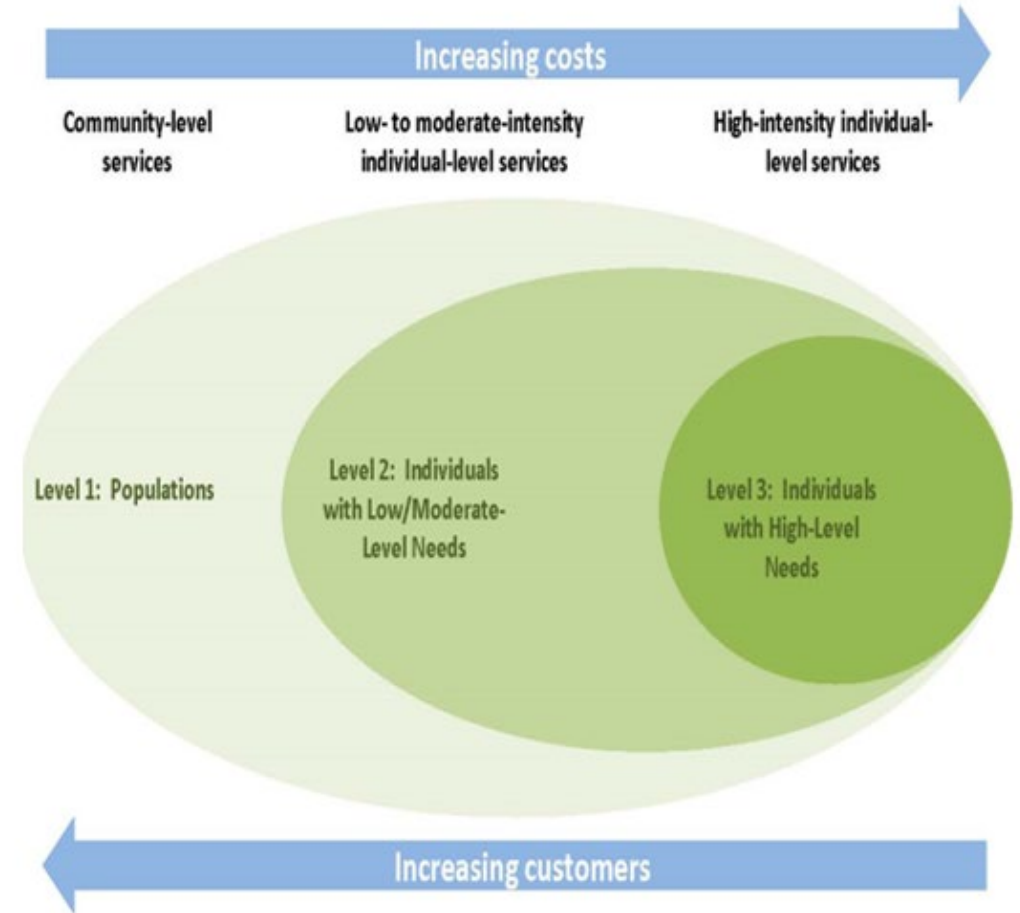

Integrated Plan - DOH and Seattle TGA

- Collaborated on the Integrated Plan
- Coordinate service delivery
- Share data system

Why Integrate?

Three Primary Reasons to Integrate HIV Care and Prevention Funding

1. Client engagement
2. Economies of scale
3. Alignment of services and systems

Shifting Paradigms

Prevention

- CDC guidelines
- Few service categories
- Minimal data collection
- Minimal standards
- Minimal coordination between agencies
- Minimal statewide coordination

Care

- HRSA guidelines
- Many service categories
- Data collection requirements
- Clear standards
- Coordination between agencies
- Extensive statewide coordination

Preparing the Community for Change

Community Engagement

- Community forums
- Community partner webinars
- Impacted communities

Planning Bodies

- HIV Planning Steering Group
- Part A Planning Council

Technical Assistance

- Quarterly one on one webinars
- On-site meet and greets

Lessons Learned

Relationship Building

- Team meetings
- Paradigm shifts

Technical Assistance

- Meet and greets
- Quarterly webinars
- Combined annual update

Common Ground

- HIV navigation services
- Community Partners

Considerations

Silos

- Each funding stream has its own contract period
- Service categories

Contracts

- Consistent task
- Single point of contact

Sub recipients

- Documentation
- Invoicing

Recommended Steps

Technical Assistance

- Meet and greets
- Quarterly webinars

Data System

- From many to one
- Consistency
- Central eligibility

Standards

- Provider manual
- Paradigm shifts

Synergy

The interaction of two or more agents to produce a combined effect greater than the sum of their separate parts.

syn·er·gy

'sinərjē/ Noun

The interaction of two or more agents to produce a combined effect greater than the sum of their separate parts
