# Correctional Health Services

## Case Study #1: NYC Jails

- Goals: Effective collaboration, communication and system coordination
- Solution: Build data exchange program to led to process efficiencies and quality improvements for federal reporting and patient care coordination
- Results: Transfer of over 66 million data elements imported from electronic health record to the Transitional Care Management System, over the last three years saving time and improving service coordination.
- Partner Access: To simplify coordination and tracking efforts.
- Dissemination and Replication: Activities in Puerto Rico
- Outcomes and Lessons Learned

# Correctional Health Services

## SPNS, NYC Correctional Health Services & Puerto Rico

### Jail Linkages:

NYC site found Latino/as less likely to remain engaged in care 6m after incarceration.

### Latino Initiative:

NYC CHS found most Latinos/as in local jails are of PR origin; need culturally appropriate resources after incarceration.

**Workforce Capacity:** NYC CHS Latino Initiative partner, One Stop Career Center of PR, to build collaboration & coordination with corrections and engage key stakeholders; NYC CHS/Reentry & Continuity Services develops workforce capacity in PR by training employment services staff in Transitional Care Coordination (TCC) intervention.

# Correctional Health Services

## Community Partners

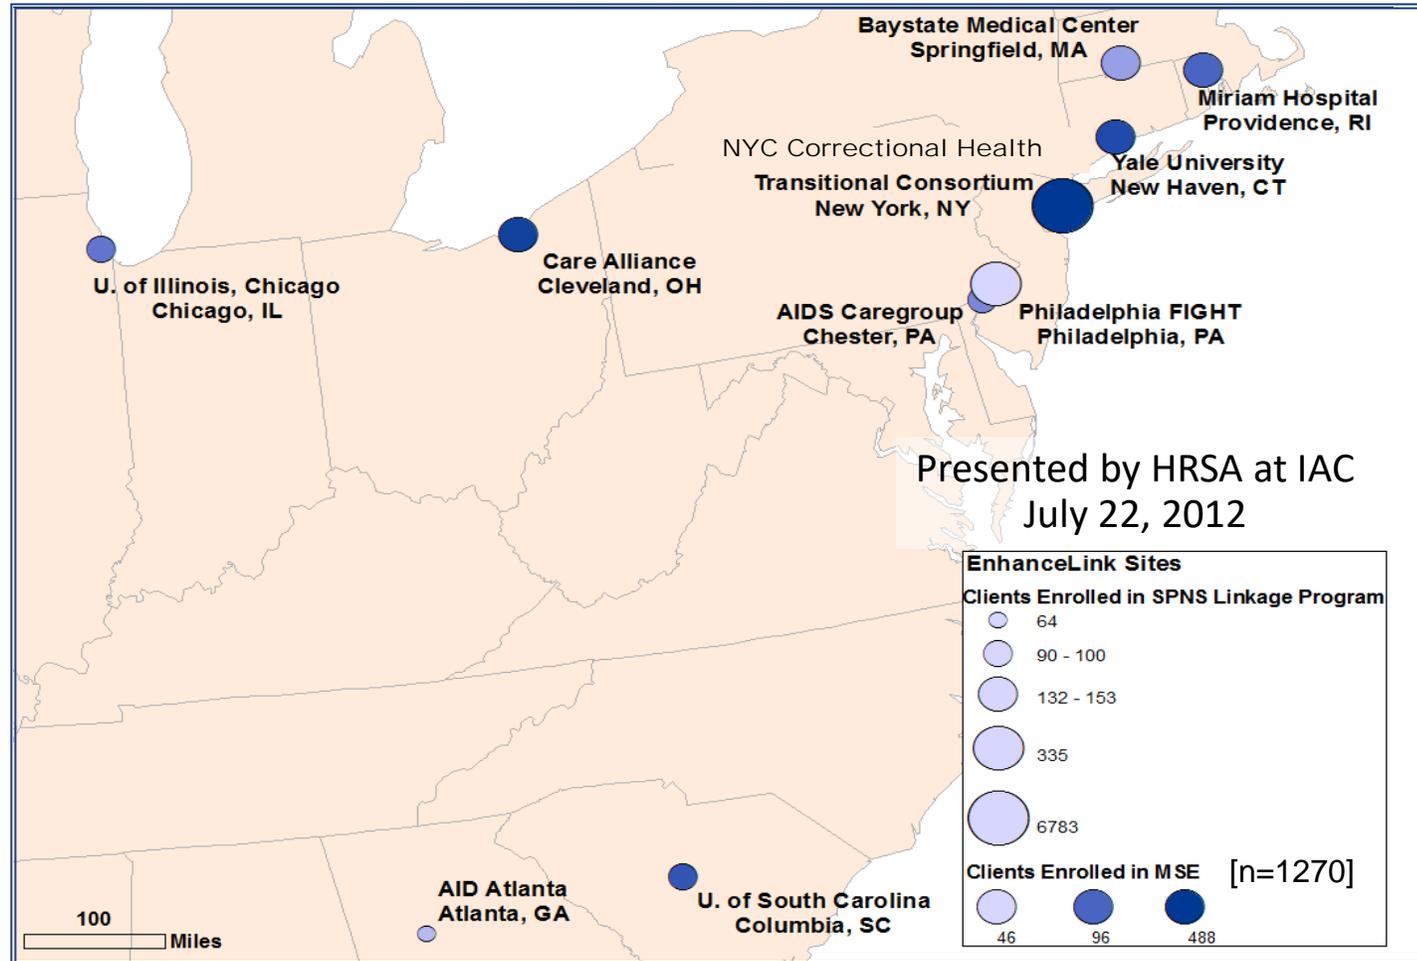

| SPNS Project       | CHS Data Sharing Partners                                                    |
|--------------------|------------------------------------------------------------------------------|
| Jail Linkages      | Exponents<br>Fortune Society<br>Palladia, Inc.<br>Women's Prison Association |
| Latino Populations | Fortune Society                                                              |
| Workforce Capacity | Fortune Society<br>One Stop Career Center – PR                               |

The Fortune Society remains a Ryan White Part A community partner offering a 'one-stop' model of coordinated care where non-medical case management, housing assistance, substance use and mental health treatment, and employment and social services are provided after incarceration – with online access to TCMS

## SPNS Jail Linkages Ten Demonstration Sites (2007-2012)

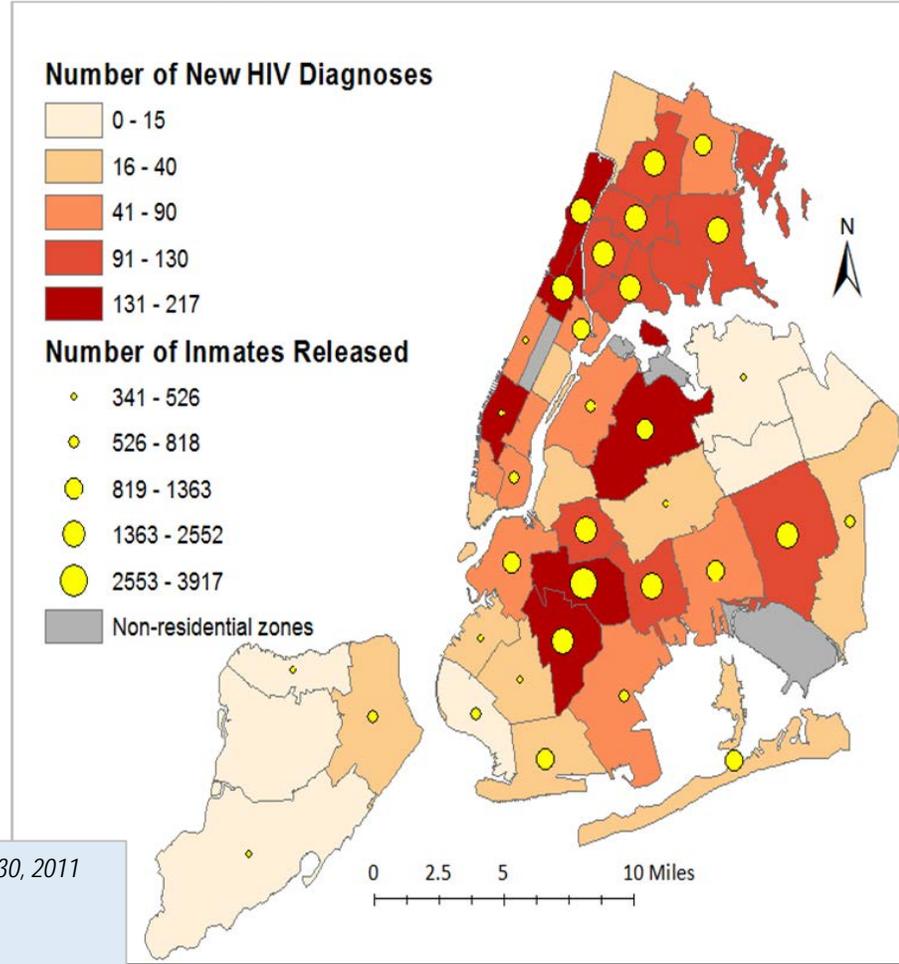

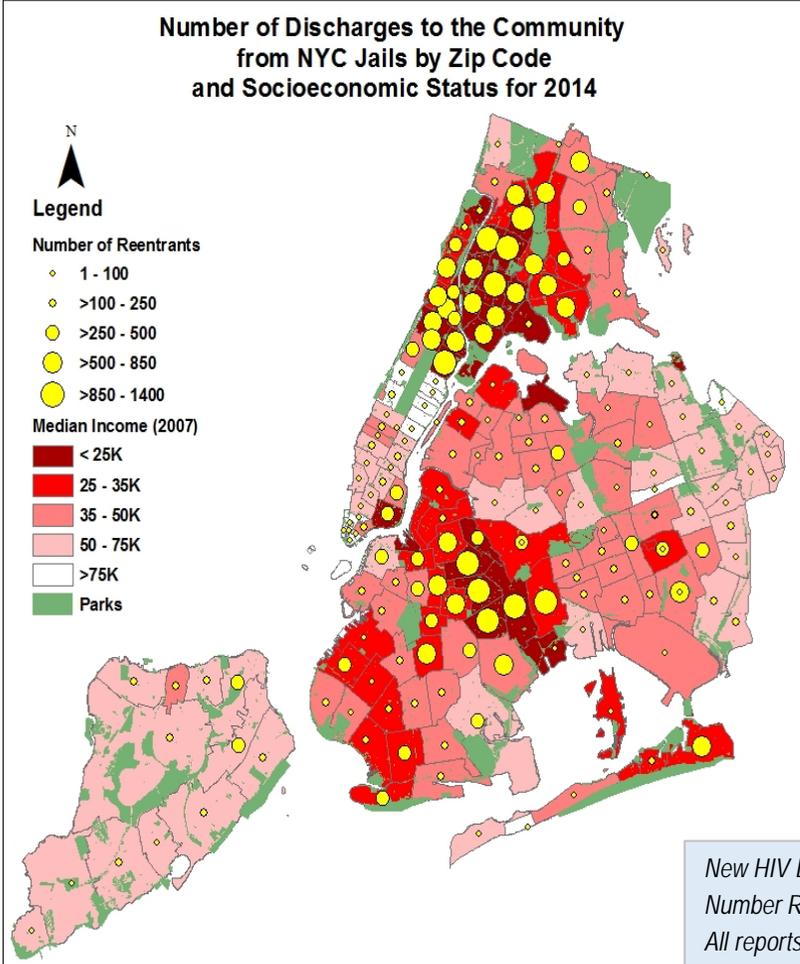

Facilitate linkage to primary care for HIV patients leaving local jails:

- Identify HIV patients in custody
- Initiate transitional services in jail
- Facilitate post-release linkage to primary care and community services.

# Correctional Health Services

## Incarceration & HIV in NYC

*New HIV Diagnoses as reported to NYC DOHMH HIV/AIDS Registry (HARS) by June 30, 2011  
Number Released to Community reported by NYC DOC.  
All reports for CFY2010 (July 1, 2009 to June 30, 2010).*

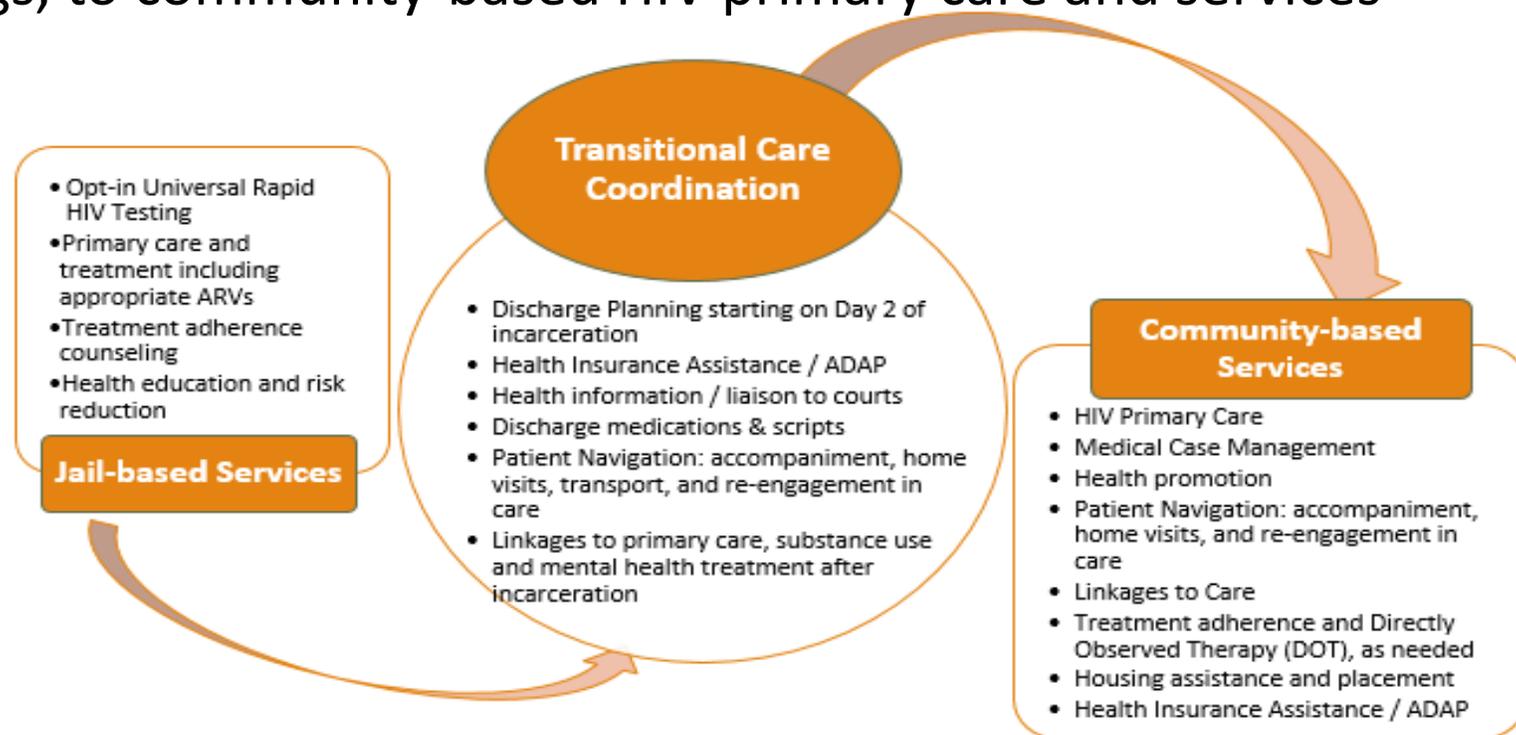

# Correctional Health Services

## NYC Intervention: Transitional Care Coordination

Purpose: To design, implement, and evaluate innovative methods for linking persons living with HIV (PLWH) in jail settings, to community-based HIV primary care and services

### Highlights:

- NYC CHS: 1/10 sites; ~40% of total enrolled
- Evaluate and disseminate NYC Transitional Care Coordination model
- Added court liaison role

# Correctional Health Services

## Transitional Care Services

Identify population – use electronic health records

Engage client – access to housing areas

Conduct assessment – universal tool

Screen for Benefits – DSS is a partner

Arrange discharge medications – 7 days + Rx

Coordinate post-release plan – Primary care, social service orgs,  
Courts, attorneys, treatment providers

Facilitate continuity of care

- Aftercare letters / transfer medical information using HIE
- Make appointments / walk-in arrangements
- Arrange transportation / accompaniment

# Correctional Health Services

## Access to Care

*non-medical case management strategies to facilitate access to care*

- Case conferencing
- Medical Summary / Medications
- Accompaniment / Transport
- Community Case Manager
- Directly Observed Connections
- Patient Navigation / Care Coordination

<https://targethiv.org/ihip/tools-tips-providing-transitional-care-coordination>

# Correctional Health Services

## SPNS Jail Linkages Outcomes\*

79% linkage to care rate after incarceration

| Indicator                 |   | NYC CHS<br>[N=555] |   | All Sites<br>[N=1270] |
|---------------------------|---|--------------------|---|-----------------------|
| <b>Clinical Care</b>      |   |                    |   |                       |
| CD 4 (mean)               | ↑ | (372 to 419)       | ↑ | (416 to 439)          |
| vL (mean)                 | ↓ | (52,313 to 14,044) | ↓ | (39,642 to 15,607)    |
| Undetectable vL           | ↑ | (11% to 22%)       | ↑ | (9.9% to 21.1%)       |
| <b>Engagement in Care</b> |   |                    |   |                       |
| # Taking ART              | ↑ | (62% to 98%)       | ↑ | (57% to 89%)          |
| ART Adherence             | ↑ | (86% to 95%)       | ↑ | (68% to 90%)          |
| Avg # ED visits p/p       | ↓ | (.60 to .2)        | ↓ | (1.1 to .59)          |
| <b>Basic Needs</b>        |   |                    |   |                       |
| Homeless                  | ↓ | (23% to 4.5%)      | ↓ | (36.2% to 19.2%)      |
| Hungry                    | ↓ | (20.5% to 1.75%)   | ↓ | (37.4% to 14.1%)      |

\*from 6 months prior to index incarceration to 6 months after baseline incarceration

# Correctional Health Services

## Jail Linkages: Access to Community Services

- Along with primary medical care, Jail Linkages clients were also connected to:
  - Medical case management (53%)
  - Substance abuse treatment (52%)
  - Housing services (29%)
  - Court advocacy (18%)
- Approximately 65% of clients accept the offer of accompaniment and / or transport to their medical appointment.
- 85% of those who were not known to be linked to care were found by field services team; 30% re-incarcerated.

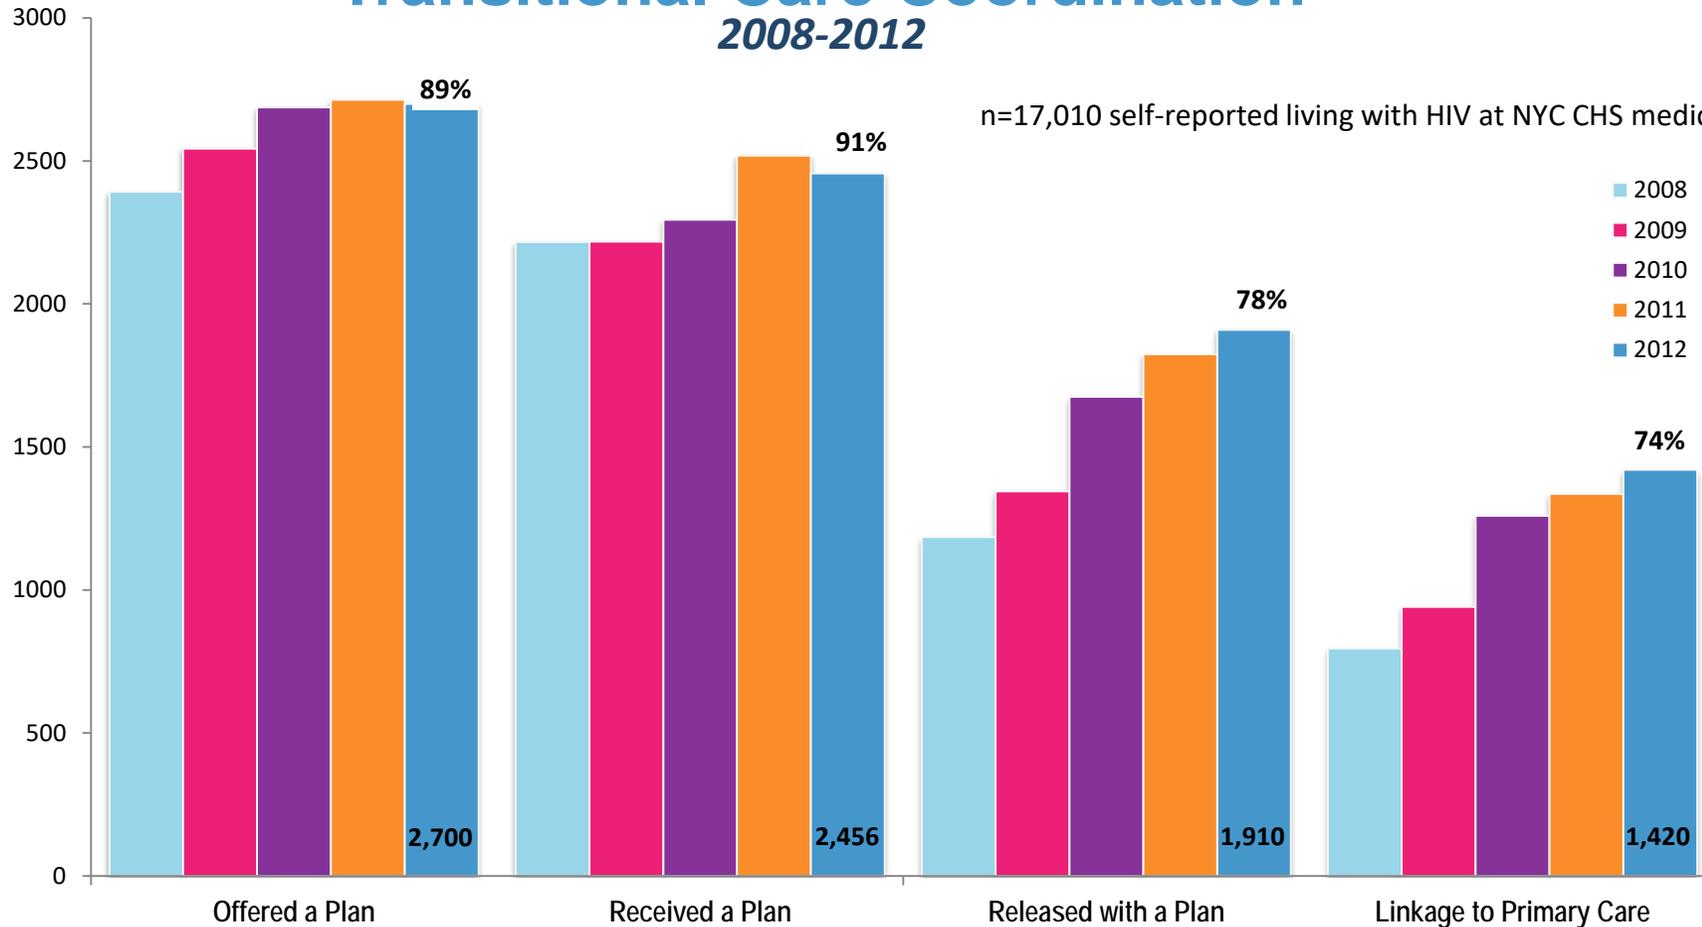

An ideal community partner offers a 'one-stop' model of coordinated care in which primary medical care is linked with medical case management, housing assistance, substance use and mental health treatment, and employment and social services.

# Correctional Health Services

## Transitional Care Coordination

2008-2012

n=17,010 self-reported living with HIV at NYC CHS medical intake

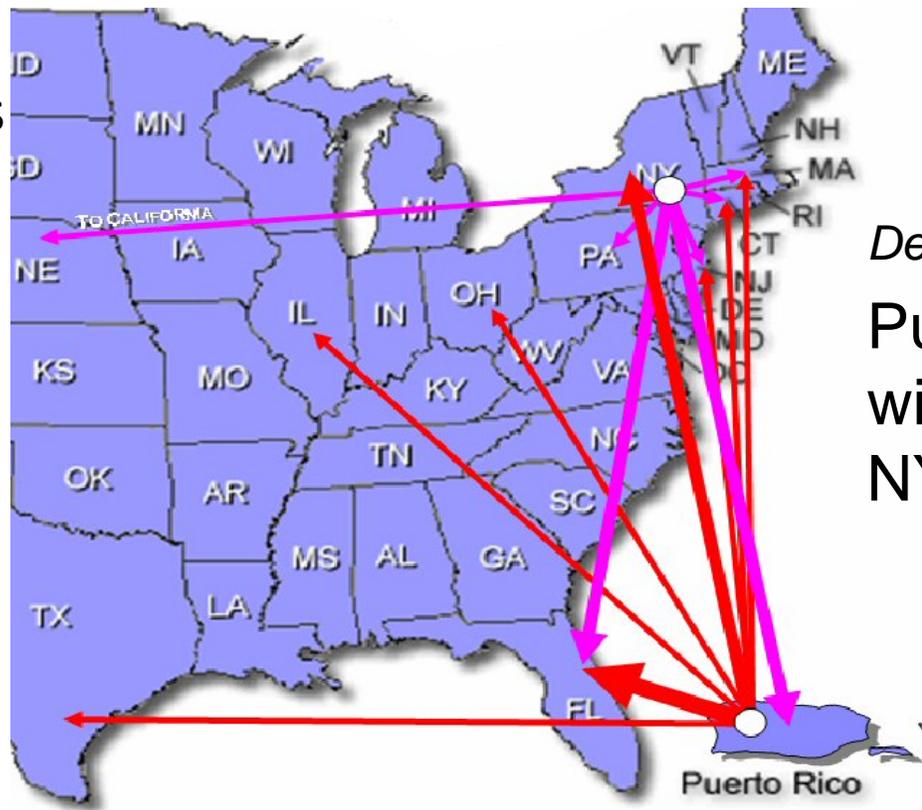

# Correctional Health Services

## SPNS Latino Access Initiative

Purpose: to design, implement, and evaluate innovative methods to identify Latinos/as who are at high risk or living with HIV and improve their access, timely entry, and retention in quality HIV primary care.

- 10 Sites
  - 4 = Puerto Rican ancestry/origin
  - 6 = Mexican ancestry/origin
- Evaluation and Technical Assistance Center: University of California at San Francisco

## “Air Bridge”

*Deren et al. 2007* found:

Puerto Ricans living with HIV seek care in NYC

- 62% of NYC-based Puerto Ricans had lived in PR
- 42% of PR-based had lived in NYC

## Transnationalism<sup>5</sup>

Processes by which immigrants forge and sustain *multi-stranded relations* that link their societies of origin and settlement. Transnationalism impacts *migrants' cultural reference points* and sources of emotional and practical support, discrimination, social stigma, beliefs about health, access to health care and health care practices.

# Correctional Health Services

## Intersection of HIV/AIDS & Incarceration in Puerto Rico

Puerto Rico (PR) has the 5<sup>th</sup> highest rate of new HIV diagnoses in the U.S.

PR has the 3<sup>rd</sup> highest rate of people living with HIV

PR has a high prison population rate (303 per 100,000):

- Over 11,000 incarcerated individuals
- 98% are men in 7 correctional centers
- 6.9% of people incarcerated in PR are living with HIV

Puerto Ricans living with HIV and coming home after incarceration often need assistance, including housing, employment and transportation, to access available HIV care in Puerto Rico

# Correctional Health Services

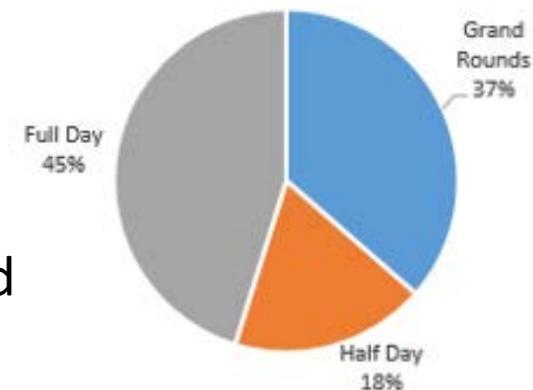

## NYC CHS Demonstration Project

Objective: Develop culturally competent providers and resources

1) Cultural competency training for NYC CHS and community providers at all levels

- 3 Formats
  - Grand rounds for physicians, nurse practitioners
  - Half day for nurses, social workers
  - Full day for care coordinators, patient navigators
- Trainings delivered to:
  - Over 60 community partner agencies
  - Over 450 participants: 47% jail-based; 53% community-based
- Sustained through online webinar series with CDC CEUs

Training Format

2) Match clients/patients to care coordinators of PR origin

- Linkage agreements with providers in NYC and PR

# Correctional Health Services Provider Training

## Key Topic Areas

- Transnationalism
- Puerto Rican & Latino Culture
- Cultural Competency
- Strategies for Improving Care
- Also: Interactive activities

This webinar series is available for health and social service professionals! Continuing Education credits for physicians, nurses, Certified Health Educators as well as general CE are available (CME, CNE, CHEC and CEU) <http://www.bxconsortium.org/cewebinarseries.html>

**Webinar 1:**  
**Curriculum Purpose, Overview, and Target Audience**  
**Module I:** Increasing Health Care Utilization among Latino/a HIV Patients

- Key Concepts:
  - Cultural Competence
  - Transnationalism
  - The Socioecological Model
  - Understanding Latino/a Culture
- The Cultural Formulation Framework
- Transnationalism in HIV Care
- The DECIDE Model
- Shared Decision Making

**Webinar 2:**  
**Key Concepts:** The U.S. Latino/a Population  
**Module II:** Overview of HIV/AIDS among Latino/as

- The National HIV/AIDS Strategy
- HIV Epidemic in the United States
- The HIV Care Continuum

**Module III:** HIV/AIDS and Incarceration among Latino/as: Interconnected Epidemics

- HIV/AIDS and Incarceration
- Case Study: Hector

[www.bxconsortium.org/CEWebinarSeries](http://www.bxconsortium.org/CEWebinarSeries)

# Correctional Health Services

## Latino Access: Collaboration Outcomes

➤ Over 60 MOUs with services providers across PR to address housing, primary care, employment, and other social services

➤ Government and community partners launched Island-wide consortium to address needs of HIV+ clients transitioning to community after incarceration

- Community providers – medical care, including HIV Primary Care, housing, substance use treatment, syringe exchange, support services, care management.
- Federal agencies – Ryan White, US DOJ
- PR Department of Correction and Rehabilitation

HIV Primary Care in PR

# Correctional Health Services

## SPNS Workforce Capacity Building Initiative

Purpose: To design, implement, and evaluate system-level strategies to increase organizations' workforce capacities and achieve efficient and sustainable service delivery practices that both optimize human resources and improve quality outcomes.

- CHS builds capacity of PR housing & employment services agency to transform service delivery to people living with HIV after incarceration:
  - Client-Level: Provide transitional care coordination services to people returning to community from prison/jail
  - Organization-level: transform employment/housing services CBO to deliver transitional care
  - System-level: transform broader system to meet needs of people returning to community after incarceration

# Correctional Health Services

## Community Partner

### One Stop Career Center of Puerto Rico (OSCC)

- Partnership with PR Department of Correction and Rehabilitation supports individuals coming home after incarceration
  - Job training and placement
  - Clear criminal records
  - Case management
  - Housing assistance
  - Eviction prevention
  - Life skills training

### Workforce Capacity Expansion

- HIV education in jails / prisons
- Transitional care coordination facilitates linkage to care
- Transportation to access care after incarceration

[www.onestopcareerpr.org](http://www.onestopcareerpr.org)

**Career Center of Puerto Rico, Inc.**  
Ayudando a Forjar Caminos

# Correctional Health Services

## Results: Transitional Care Coordination in PR

- OSCC staff working in 13/32 correctional facilities in PR
- Prevention education/risk reduction sessions provided at jail orientations to identify potential clients (n=360)
- 69 enrolled and completed baseline interviews
  - All receiving transitional care coordination
  - 10 additional served as part of pilot
- 58 returned to community after incarceration
  - 54 of 58 eligible (93%) linked to HIV primary care and other services after incarceration
  - All 10 (100%) pilot participants linked to care

### *Housing & Employment*

Housing services: 22

- 19 transitional
- 5 permanent

Job readiness: 15

- 12 employed;
- 1 volunteer;
- 2 seeking employment

# Correctional Health Services

TCC Plan received

Community Return

Linkage to Care

# Correctional Health Services Implementation Challenges

- Identifying right fit programs: personal relationships v. formal expertise
- Proposal evaluation methodology favors existing programs
- Formal authority/documents from predecessors are insufficient to gain buy-in
- Culture of corrections varies by location/jurisdiction
- Opening/closing of programs absent formal communication system
- Frequent turnover and changes in local government leadership
- Poor local economy, lack of affordable housing/shelters
- Hurricane Maria...

food and essentials

# SPNS Jail Linkages: Making the Case

# SPNS Jail Linkages: Making the Case

## Challenges

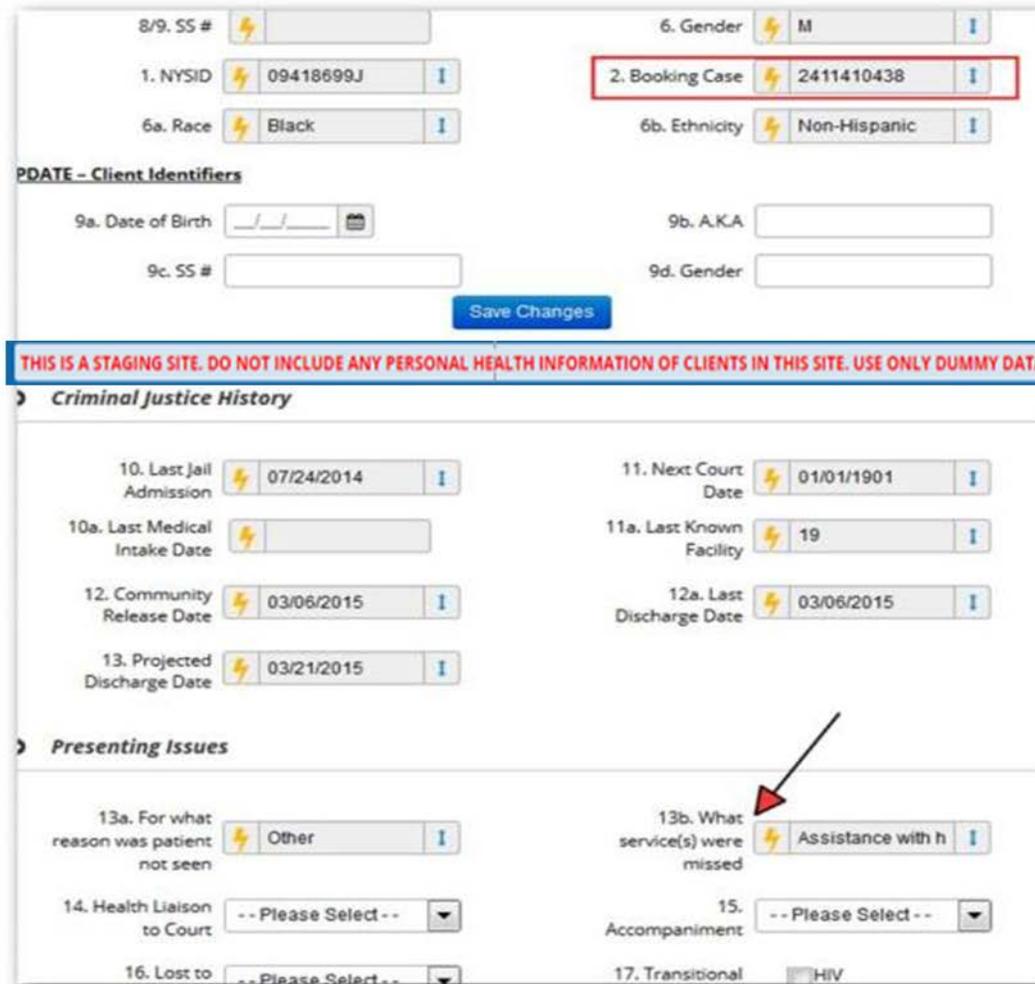

- ✗ Time spent on entering data into multiple excel sheets hence less effective and lower efficiency
- ✗ Time spent on cleaning up errors in multiple excel sheets
- ✗ Double data entry
- ✗ Communication back and forth on data clean up
- ✗ No ability to monitor real time activities

## Solutions

- ✓ No more paper/excel sheets thus improved effectiveness and efficiency
- ✓ Work smarter and not harder
- ✓ Projected to redirect 10-15% from admin to direct service delivery
- ✓ Partners can access information with consent on file
- ✓ No more double data entry, direct data integration from EMR
- ✓ Instant access to management reports
- ✓ Accountability of community partners

# The Whoosh! ... Transitional Care Management System

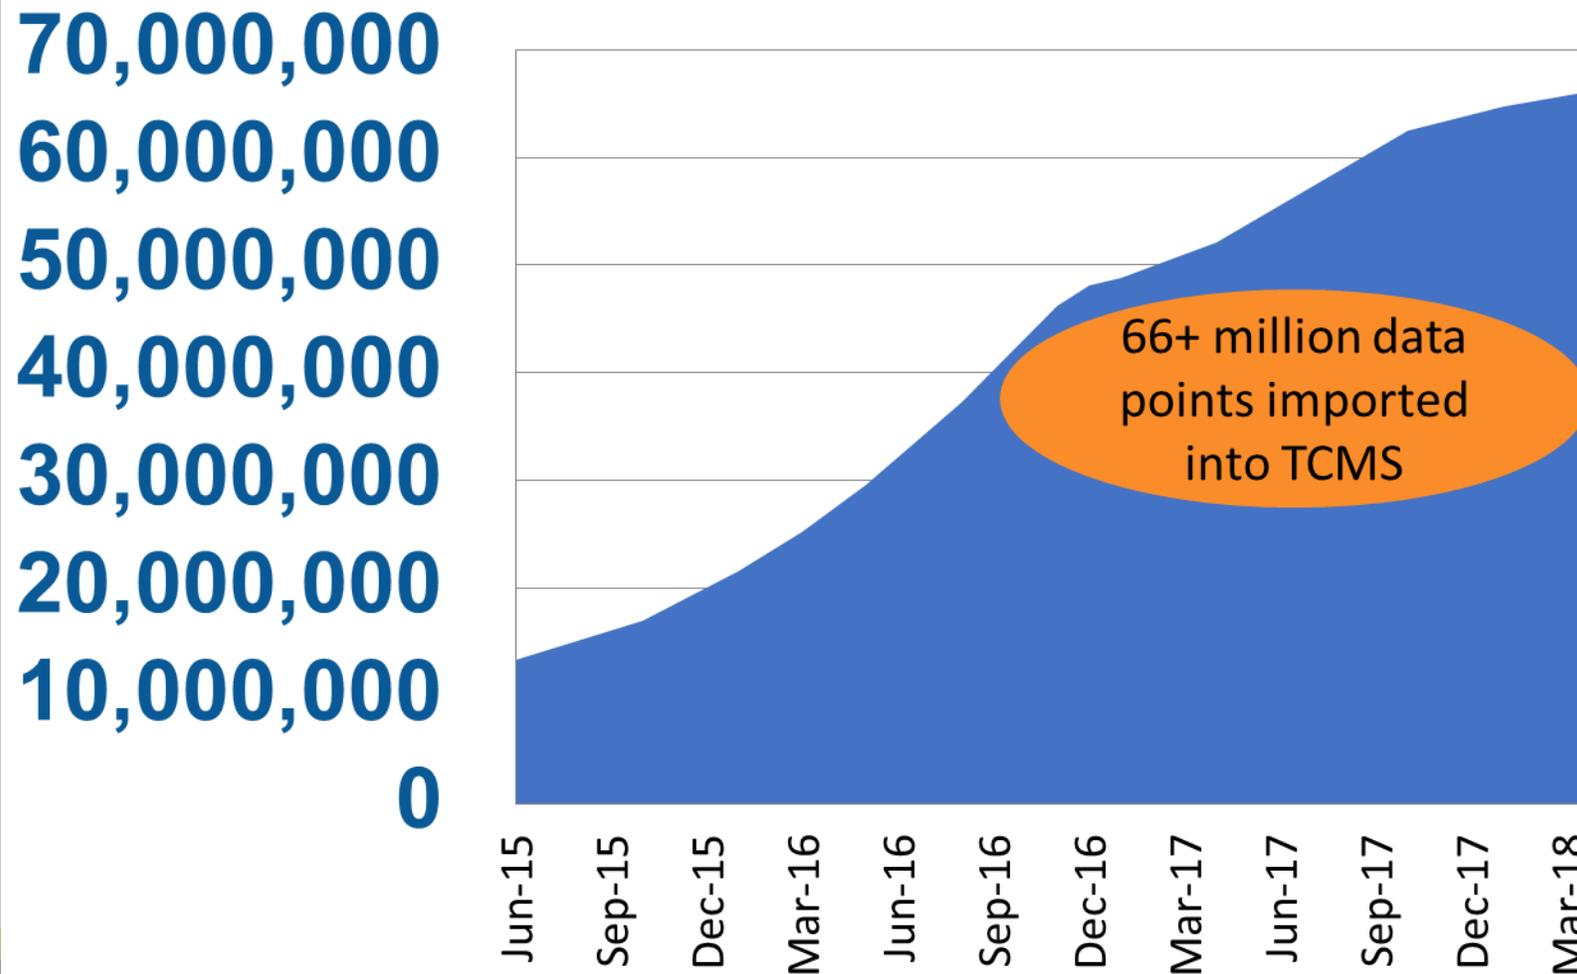

TCMS collects data and, through an interface, imports meaningful data points for the end user.

The screenshot displays the 'Case Management' section of the TCMS interface. It features a navigation bar with tabs for 'Insurance', 'Discharge Plan', 'Case Management', 'Medical Summary', and 'Post-Release Disposition'. A red warning banner states: 'THIS IS A STAGING SITE. DO NOT INCLUDE ANY PERSONAL HEALTH INFORMATION OF CLIENTS IN THIS SITE. USE ONLY DUMMY DATA.' The form is organized into three sections:

- Court Advocacy:**
  - 83. Eligibility determination: Other
  - 83a. Eligibility determination -- Other (please describe): Yes
  - 84. Date of Next Court Appearance: Yesterday
  - 85. Completed Appointment Preparation?: No
  - 86. Appointment Date: Tomorrow
- Referrals to Care Management:**
  - 87. Health Home Enrolled?: Maybe
  - 87a. If enrolled, record Health Home provider: Umbrella Corporation, Division 1
  - 87b. For which programs is this client eligible?: Other
  - 87c. For which programs is this client eligible? -- Other Health Home Organization (specify in notes): Something
  - 88. To which care management organization is the patient referred?: Umbrella Corporation, Division 2
  - 88a. Date referred to Care Management Partner: Day After Tomorrow
  - 88b. Partner referral status?: Jury's Still Out
- Referral to RITC Partner:**
  - 89. To which organization was the patient referred?: Umbrella Corporation, Divis
  - 90. Date referred to RITC Partner: Two Days After the Morning

TCMS facilitates coordinated care management with multiple service providers and facilitates cross-system collaboration.

# Correctional Health Services

## Lessons Learned

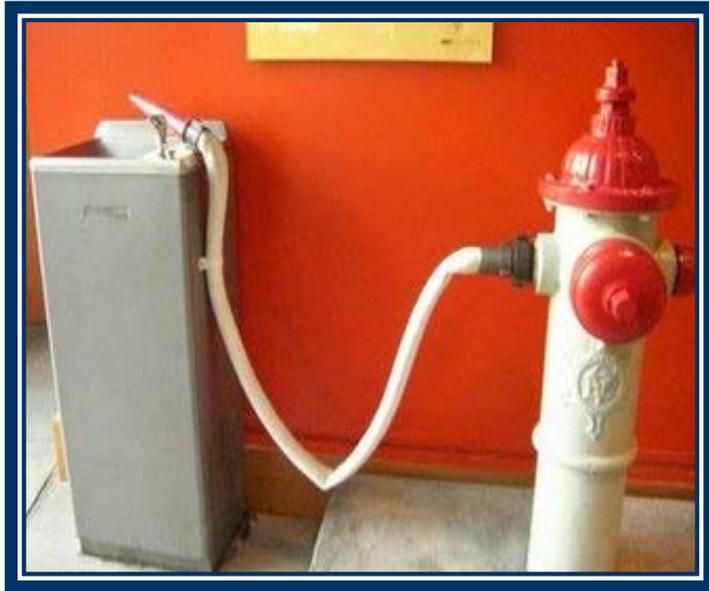

1. Networking with other agencies & jurisdictions identified core organizations and champions
2. Pooling resources + working with government helps establish best practices to facilitate continuity of care
3. Coordination & collaboration between Ryan White service network and local CBOs improves access for those out of care.
4. Build on established relationships, develop formal agreements, create synergy among medical & service programs (housing, employment, mental health / substance use)
5. Participate & engage with RW HIV Planning Council key stakeholders
6. Annual convening of stakeholders helps create strategies to address population needs
7. Data systems integration helps improve care coordination, data reporting & quality management
8. Transitional Consortium leadership supports relationships & leverages resources to coordinate care
9. Engaging client during incarceration fosters relationships to endure after incarceration
10. Transportation access helps ensure linkage to care after incarceration
