

## Q&A Summary for *ADR TRAX* (March 23, 2016)

#	Questions	Answers
1.	Is CHEX new this year?	No, CHEX was available when TRAX was first released as part of the 2014 reporting period. We have updated it to include changes in the 2015 validations.
2.	Are racial/ethnic subgroup values required?	Yes, they are required. Race/ethnicity subgroups were new in 2014, but should now be included in your submissions.
3.	Are there any plans to add a merge record option for duplicate clients like the merge record option that was offered in Rx-Rex?	No, HAB is considering incorporating a feature that would allow ADAPs to export duplicate client records in a report for review, but not for 2015 reporting.
4.	If DUP clients are detected and they are in error, does TRAX help you merge them (like RX-Rex used to)?	No, see above.
