

Q&A Summary for 669 – Check Your XML 11.13.19

| # | Questions | Answers |
|----|--|--|
| 1. | When will the slides be made available? | The webinar recording is usually available within 1 week of the webinar. The webinar slides and Q & A are usually posted within 2 weeks. You can find webinar archives here . |
| 2. | How can we match eUCIs to client numbers in order to find validation errors in our data? | This depends on the data system you are using. Please contact the DART Team at data.ta@caiglobal.org to ask about how your data system supports this process. |
| 3. | Does TRAX have a similar tool to the Check Your XML feature? | Yes. In the TRAX download folder, you will find an Excel file called CHEX. Before you run the TRAX application, you can enter your data into CHEX to identify any data quality issues before creating your XML file. |
| 4. | Can files generated through Provide Enterprise be input to the Check Your XML feature? Is using Check Your XML still helpful for providers who use Provide Enterprise? | As an RSR-Ready System , Provide Enterprise can directly create your RSR XML file. You may put this file into the Check Your XML feature. While the Check Your XML feature is not required to use, it can still be useful to use for users with RSR-Ready Systems. |
| 5. | How can I check my version of CAREWare? | For more information about CAREWare builds and upgrading to CAREWare 6, please contact the CAREWare Help Desk . |
| 6. | Where should I start when preparing to submit the 2019 RSR? | The best place to start when submitting the RSR is the most recent RSR Instructional Manual . |
