

Translation and Replication of SPNS Models: Moving Hard-to-Reach Clients along the HIV Care Continuum

Shelly Kowalczyk *The MayaTech Corporation*

Sarah Cook-Raymond *Impact Marketing + Communications*

Karissa Page *Louisiana Department of Health*

Lauren Yerkes *Virginia Department of Health*

Tawnya Brown *Washington University School of Medicine*

Disclosures

Presenters have no financial interest to disclose.

This continuing education activity is managed and accredited by Professional Education Services Group in cooperation with HSRA and LRG. PESG, HSRA, LRG and all accrediting organizations do not support or endorse any product or service mentioned in this activity.

PESG, HRSA, and LRG staff has no financial interest to disclose.

Learning Objectives

At the conclusion of this activity, the participant will be able to:

1. Identify resources developed to support the implementation and replication of successful models of HIV care
2. Describe steps to implementing models of care for preparing HIV-positive incarcerated individuals for release and linking them to care
3. Describe steps for implementing a model of care for addressing comorbid HCV infection among people living with HIV/AIDS

Special Projects of National Significance (SPNS) Reflects:

- Changes in the epidemic
- Alignment with HIV national policy strategies
- Changes in the healthcare environment
- Replicable and sustainable care models

HIV Care Continuum

Advancing the HIV Care Continuum

SPNS has funded initiatives along the steps of the **HIV Care Continuum** including projects focused on:

populations not in care

outreach

linkage to care

medication adherence

**retention/
re-engagement**

Integrating HIV Innovative Practices (IHIP)

SPNS Program Challenges:

- Great models of care and lessons learned from successful SPNS initiatives but difficulty with dissemination

Solutions:

- IHIP Project designed to improve dissemination & replication through training tools that help providers take SPNS lessons and implement them in their own practices

Results:

- More informed providers, stronger workforce, & healthier patients
- Supports and advances federal priorities and strategies

IHIP...

Promotes, markets, and disseminates effective strategies and lessons learned to support optimal implementation of successful models of HIV care.

Strategies include:

- Developing implementation tools and resources specific to interventions developed as part of the evidence-informed SPNS initiatives
- Disseminating information to raise awareness about the tools and resources
- Providing capacity building assistance (CBA)

Approaches to Capacity Building Assistance

- **e-newsletter** to market tools, resources, and forthcoming SPNS webinars
- Providing an **online collaborative platform** (listserv) that supports knowledge exchange
- An **e-mail helpdesk** to provide **TA** support to intervention implementers
- Using Ryan White-funded grantees with SPNS intervention implementation experience to engage in **peer-to-peer sharing** of best practices
- Participating in **conferences and meetings** to introduce SPNS interventions and accompanying tools and resources

IHIP Resources @ the TARGET Center (<https://careacttarget.org/ihip>)

The screenshot displays the TARGET Center website interface. At the top left is the TARGET Center logo with the tagline "Tools for the Ryan White Community". To the right is the slogan "Supporting HIV care through education and innovation". A navigation bar includes "Topics Library", "News and Events", "Ryan White Community", and "Help Desk", along with a search box. The main content area features a sidebar with links to "iHiP Home", "Buprenorphine: Training Manual", "Buprenorphine: Curriculum", "Buprenorphine: Monograph", "Buprenorphine: FAQ and Peer Discussion", "Training and Implementation Webinar", and "Clinical Aspects Webinar". The central content is titled "Integrating HIV Innovative Practices (IHIP)" and includes a "Description" section. The description welcomes users to iHiP, explaining its purpose in helping providers learn about tested and proven HIV strategies. It mentions that these practices are supported by SPNS (Special Projects of National Significance) from the HIV/AIDS Bureau. The text states that iHiP helps turn tested innovation into practice, leading to better care and healthier patients. It also notes that products are informed by SPNS research and evaluation, including training manuals and curricula. A call to action encourages users to share their experiences on a wiki and connect with an online community. On the right side of the page, there are social media sharing options, a "Rate this Page" section with a 5-star rating and 19 total votes, a "Browse for More" section with links to "Source Type: TA Contract" and "Topic Areas: Substance Abuse Part F - SPNS Models of Care", and an "Add a Badge to Your Website" section featuring the iHiP logo and a button to "Access Training Materials".

Integrating HIV Innovative Practices (IHIP)

Description

Welcome to iHiP, Integrating HIV Innovative Practices. This site is dedicated to helping you learn about tested and proven HIV strategies. Building upon the Health Resources and Services Administration, HIV/AIDS Bureau's Special Projects of National Significance (SPNS), the practices outlined here have demonstrated success and replicability across health care settings.

iHiP quite literally helps you take tested innovation and turn it into practice. It's where training meets implementation. The results are more informed providers, better care delivery and, ultimately, healthier patients and communities.

iHiP products are informed by SPNS research and evaluation. Products include easy to use training manuals as well as curricula. Associated Webinars are designed to provide a more interactive experience with experts and a wiki exists for you to find answers to your questions, share your own lessons learned, and connect with an online community.

Over time, new iHiP products are added to this site so come back frequently, share your voice and experience on the wiki, and let us help you build a better program for a brighter future.
