Mountain West AIDS Education and Training Center

Caring for HIV+ Patients in Challenging Settings

Natalia Martínez Paz, MPA, MA
Program Manager, Mountain West AETC ECHO
University of Washington

Presentation prepared by: Natalia Martínez Paz, MPA, MA

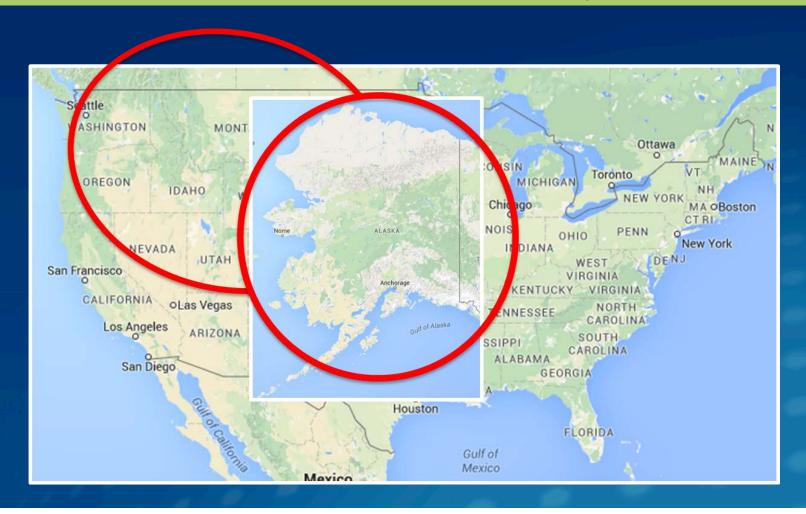

The Problem

Ħ

Mountain West AIDS Education and Training Center

This presentation is intended for educational use only, and does not in any way constitute medical consultation or advice related to any specific patient.

The Theory

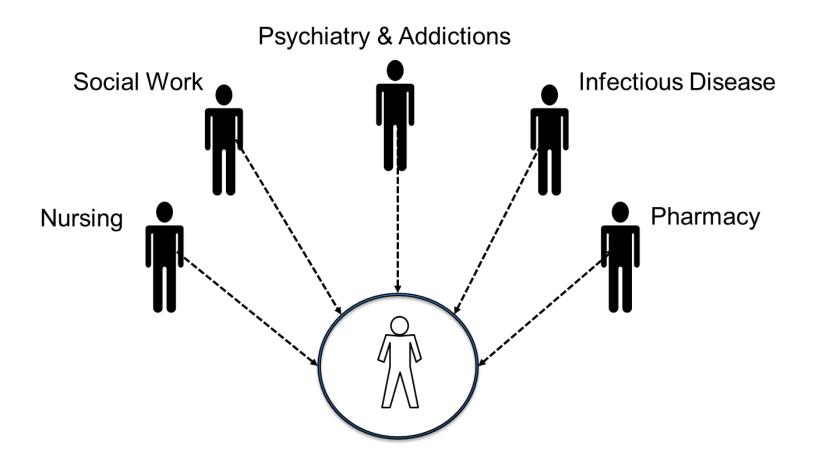

Why provide specialty training?

- 1. People need access to specialty care for their complex health conditions.
- 2. There aren't enough specialists to treat everyone who needs care, especially in rural and underserved communities.
- 3. ECHO trains primary care clinicians to provide specialty care services. This means more people can get the care they need.
- 4. Patients get the right care, in the right place, at the right time. This improves outcomes and reduces costs.

 Grant Research Support: Bristol Myers Squibb, Janssen Therapeutics, Gilead Sciences, Merck and Company, ViiV Healthcare/GSK, AbbVie, Sanganmo Biosciences

Additional Disclosure Statements

causes of renal insufficiency, as you are doing, and would have a low threshold for a Nephrology consult.

Medication dosing: we are generally lenient with 3TC dosing given that the
medication does not carry high risk of toxicity, but we do feel that if he is

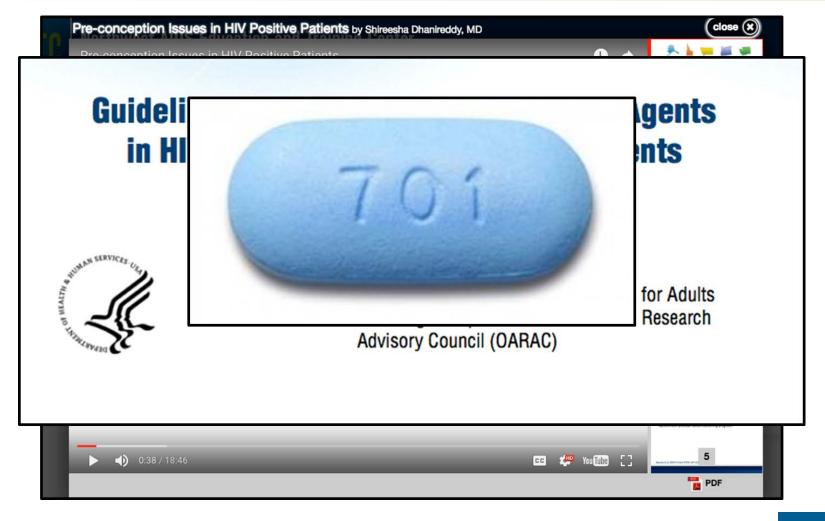

Impact

Best Practices and Provider Knowledge

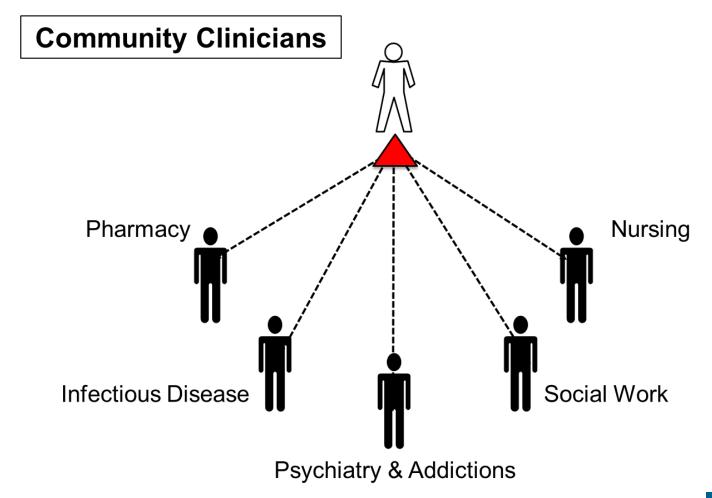

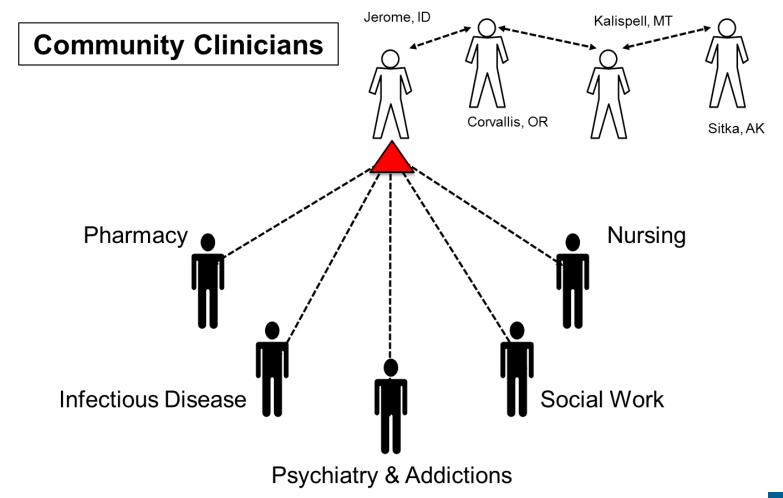

Building Knowledge

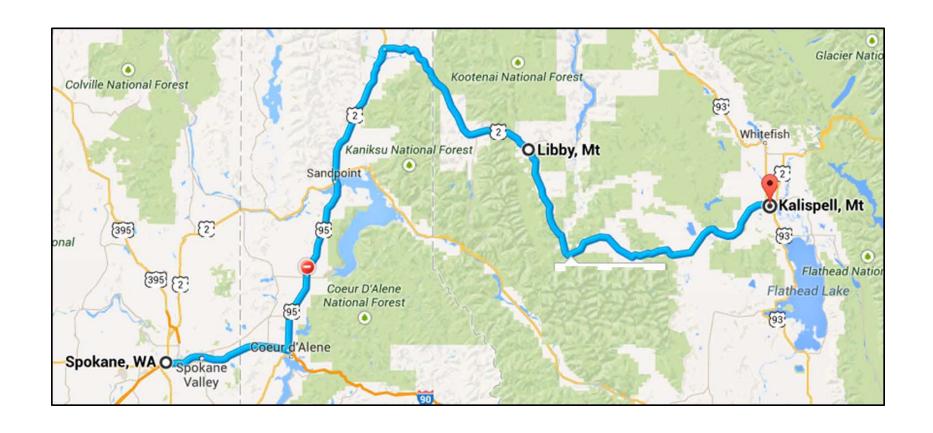

Horizontal Knowledge Transfer

Fostering Peer-to-Peer Network & Support System Across Region

Complex and High Risk

- Herpes simplex virus type 2 (HSV-2)
- Latent tuberculosis
- Syphilis
- Hepatitis C
- Anxiety
- Bipolar disorder
- Major depressive disorders

Impact of ECHO on Pregnancy Care

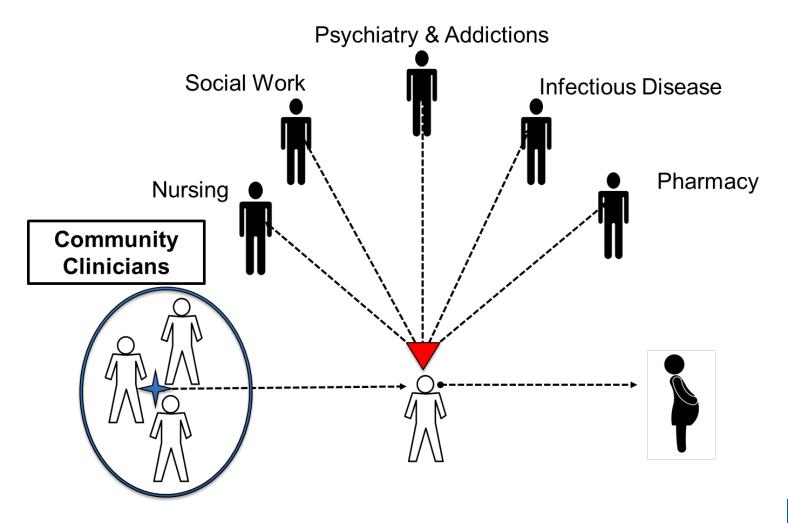

Topic	Extremely	Moderately	Slightly	Not at all	Unsure
Initiating or changing ART in pregnancy	44% (18)	37% (15)	10% (4)	2% (1)	7% (3)
Developing a pregnancy delivery plan	32% (13)	32% (13)	20% (8)	5% (2)	12%(5)
Lab monitoring	27% (11)	41% (17)	17% (7)	2% (1)	12% (5)
Mental health	10% (4)	41% (17)	32% (13)	5% (2)	12% (5)
Substance use	7% (3)	37% (15)	32% (13)	7% (3)	17% (7)
Co-infections	20% (8)	34% (14)	29% (12)	5% (2)	12% (5)
Breastfeeding	27% (11)	44% (18)	15% (6)	5% (2)	10% (4)
Changing ART post-partum	27% (11)	37% (15)	17% (8)	5% (2)	12% (5)
Infant diagnosis/prophylaxis	27% (11)	39% (16)	20% (8)	2% (1)	12% (5)
Overall knowledge	32% (13)	44% (18)	12% (5)	2% (1)	10% (4)

Reported impact of ECHO participation on survey respondent knowledge of various topics related to HIV management in pregnancy.

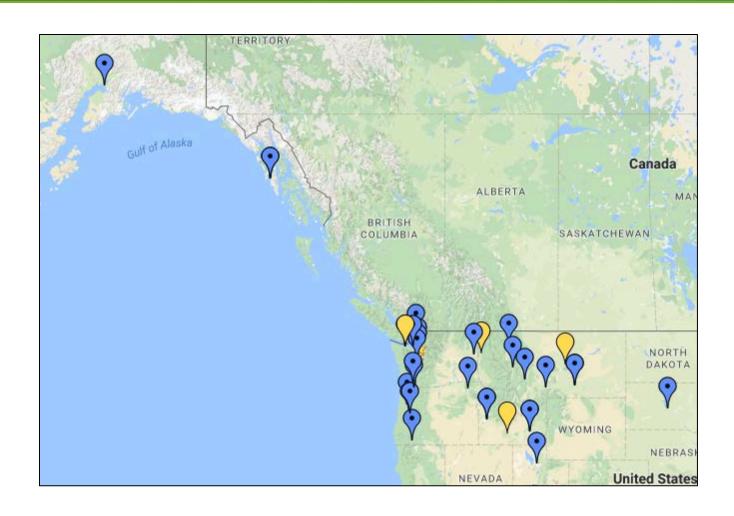

Caring for HIV+ Patients

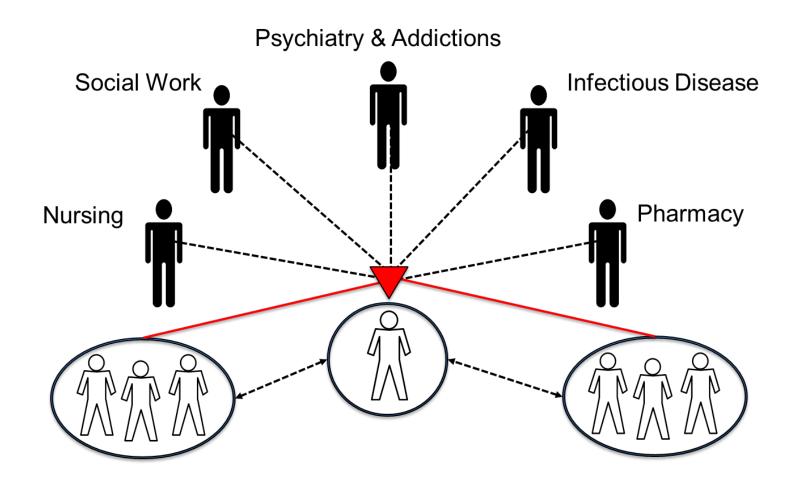

Capacity Building

Building a Community of Learning

Just In Time Access

Core of ECHO

- Increase community medical provider knowledge and confidence related to best-practice HIV medicine
- Decrease feelings of professional isolation
- Engender local and regional HIV care champions

Thank You!
