

Activity 2.1: Pre- and Post-Session Discussion Questions about RWHAP Part A Community Planning

TIPS FOR TRAINERS

Suggested Use

Use the first question for discussion at the beginning of the presentation on RWHAP Part A Community Planning, and the second at the end of the presentation.

Time

45 minutes total:

- 15 minutes pre-session
- 30 minutes post-session

Materials

- Pre- and Post- Session Discussion Questions, provided as a handout or projected as slides.

Knowledge or Skill Development

Participant awareness of the value, importance, and components of the RWHAP Part A HIV community planning process and the role of the planning council/planning body (PC/PB)

Activity Steps

Pre-Session Discussion

1. Ask each participant to think individually for a minute about the question.
2. Then ask participants to share and discuss their responses. Try to get input from each participant, going around the room if necessary.
3. Sum up what was said, including what the participants identified as things they want to know about HIV community planning.

Post-Session Discussion

4. Divide participants into small groups.
 - If participants are seated at small tables, have them work with others at their table, choosing a **facilitator** to coordinate the work of the group, and a **reporter** to write the list on easel pad paper and make the presentation to the full group.
 - If participants are seated around a large table, ask them to work in groups of three, and to choose one person to write their list on easel pad paper to present to the full group.
5. Ask participants to discuss the question in their small group, brainstorming an initial list of important things to know, discussing and agreeing on the 3-5 that are most important, and listing them on easel pad paper. Give them 15 minutes in the small group.
6. Ask the reporters to put their lists next to each other on a wall of the room. Ask one to present the first list, and the other reporters in turn to add and compare based on their lists.
7. Ask the full group to comment.
8. Summarize the discussion, highlighting the items that were most often included in the small group lists and adding any missing items important for successful HIV community planning.

Activity 2.1: Pre- and Post-Session Discussion Questions about RWHAP Part A Community Planning

HANDOUT FOR PARTICIPANTS

Pre-Session Discussion Question

Please think individually about your answers to the question for a minute or two. Be prepared to share your thoughts with the full group.

Why is it important for the RWHAP Part A program to include an HIV community planning process—what are the benefits?

Post-Session Discussion Question

In your small group brainstorm a list of important things to know about HIV community planning. Then discuss them and agree on 3-5 you consider most important, and have someone list them on easel pad paper to present to the full group.

If you wanted a potential PC/PB member without community planning experience to understand HIV community planning, what are the 3-5 most important things you would discuss with that person?
