

SEXUALLY TRANSMITTED INFECTION (STI) SCREENING CODES

GONORRHEA	
Recommendation: <ul style="list-style-type: none"> One annual screening for gonorrhea women who are NOT at increased risk Pregnant women, up to two screenings per pregnancy for patients at increased risk Not enough data to recommend screening in men 	
CPT Code	Description
87590	Infectious agent detection by nucleic acid (DNA or RNA) <i>Neisseria gonorrhoeae</i> , direct probe technique
87591	Infectious agent detection by nucleic acid (DNA or RNA) <i>Neisseria gonorrhoeae</i> , amplified probe technique
87592	Infectious agent detection by nucleic acid (DNA or RNA) <i>Neisseria gonorrhoeae</i> , quantification

HEPATITIS B	
Recommendation: <ul style="list-style-type: none"> Screening for at risk individuals, no frequency recommended Pregnant women, screening recommended at the first visit 	
CPT Code	Description
Infectious agent antigen detection by immunoassay technique, (eg, enzyme immunoassay [EIA], enzyme-linked immunosorbent assay [ELISA], immunochemiluminometric assay [IMCA]) qualitative or semiquantitative, multiple-step method	
87340	hepatitis B surface antigen (HBsAg)
87341	hepatitis B surface antigen (HBsAg) neutralization

CHLAMYDIA	
Recommendation: <ul style="list-style-type: none"> One annual screening for women at increased risk Pregnant women, up to two screenings per pregnancy for individuals at increased risk for STIs Not enough information to recommend screening in men 	
CPT Code	Description
86631	Antibody Chlamydia
86632	Antibody Chlamydia, IgM
87110	Culture, chlamydia, any source
87270	Infectious agent antigen detection by immunofluorescent technique <i>chlamydia trachomatis</i>
87320	Infectious agent antigen detection by immunoassay technique (e.g., enzyme immunoassay [EIA], enzyme-linked immunosorbent assay [ELISA], immunochemiluminometric assay [IMCA]) qualitative or semiquantitative, multiple-step method, <i>chlamydia trachomatis</i>
87490	Infectious disease agent detection by nucleic acid (DNA or RNA) <i>Chlamydia trachomatis</i> , direct probe technique
87491	Infectious diseases agent detection by nucleic acid (DNA or RNA) <i>Chlamydia trachomatis</i> , amplified probe technique
87810	Infectious agent antigen detection by immunoassay with direct optical observation <i>chlamydia trachomatis</i>
